TT-SAT-04

SAT-STYLE PRACTICE SERIES

SAT
Practice Test

Digital format, printed. Sit it in one go, on the clock, then mark it and learn from every miss.

4	120	164
MODULES	QUESTIONS	MINUTES

Before you start

- [ ] A sharp pencil, an eraser, and a watch or timer
- [ ] A calculator for the two Math modules
- [ ] A quiet table and about 184 minutes with no interruptions
- [ ] Circle your answers in this booklet, or use the answer sheet at the back

MODULE	QUESTIONS	TIME
Reading and Writing, Module 1	33	39 min
Reading and Writing, Module 2 (harder)	33	39 min
Math, Module 1 (calculator permitted)	27	43 min
Math, Module 2 (harder)	27	43 min

Every question in this test is original and written by Testiddle. It follows the common patterns of the real exam but is not affiliated with, or endorsed by, any exam provider.

Test begins on the next page.

Start your timer now.

1 Reading and Writing

33 QUESTIONS 39 MINUTES

DIRECTIONS

The questions in this section address a number of important reading and writing skills. Each question includes one or more passages, which may include a table or graph. Read each passage and question carefully, and then choose the best answer to the question based on the passage(s).

All questions in this section are multiple-choice with four answer choices. Each question has a single best answer. Circle your answer in the booklet.

PACE YOURSELF

You have **39 minutes** for **33 questions**, which is about **71 seconds** a question. Answer what you can quickly, circle the ones that need more time, and come back to them before time is called. There is no penalty for a wrong answer, so never leave a question blank.

WHAT YOU WILL SEE IN THIS MODULE

- Words in context
- Text structure and purpose
- Cross-text connections
- Central ideas and details
- Command of evidence: quantitative
- Command of evidence: textual
- Inferences
- Form, structure, and sense
- Boundaries
- Transitions
- Rhetorical synthesis

Questions 1 to 4 of 33

1 WORDS IN CONTEXT

The scientist's results were so _____ with the standard model that she spent two years checking her equipment before she dared to publish them.

Which choice completes the text with the most logical and precise word or phrase?

(A) inconsistent

(B) compatible

(C) satisfied

(D) bound

2 WORDS IN CONTEXT

The old lighthouse, once a _____ landmark that every sailor knew, now stands abandoned, and its beam has not been lit in decades.

Which choice completes the text with the most logical and precise word or phrase?

(A) hidden

(B) dangerous

(C) temporary

(D) prominent

3 WORDS IN CONTEXT

Tired of the city's constant noise, the poet moved to a village where the only sounds were the wind and the occasional bell, and she found the _____ soothing.

Which choice completes the text with the most logical and precise word or phrase?

(A) clamour

(B) congestion

(C) stillness

(D) bustle

4 WORDS IN CONTEXT

The board approved the budget only after the director _____ the most expensive item, a decision that saved nearly a third of the cost.

Which choice completes the text with the most logical and precise word or phrase?

(A) announced

(B) eliminated

(C) defended

(D) doubled

5 WORDS IN CONTEXT

The two studies reached _____ conclusions: one found that the treatment worked, while the other found that it did not.

Which choice completes the text with the most logical and precise word or phrase?

A) opposing

B) identical

C) tentative

D) familiar

6 TEXT STRUCTURE AND PURPOSE

The following text is adapted from an original essay about the invention of the bicycle.

> The earliest bicycles had no pedals. Riders sat astride a wooden frame and pushed along the ground with their feet, a method that was fast on flat roads but exhausting on hills. It was the addition of pedals to the front wheel, in the 1860s, that turned a curiosity into a means of transport. Within a decade, the machines were being manufactured by the thousand.

Which choice best describes the function of the underlined sentence in the text as a whole?

A) It explains why the earliest bicycles were fast.

B) It contrasts bicycles with other methods of transport.

C) It questions whether pedals were a good idea.

D) It identifies the change that made the invention practical and popular.

7 TEXT STRUCTURE AND PURPOSE

The following text is from an original short story. Marit is visiting the farm where she was raised.

> The gate had been painted green since she last saw it, which seemed to Marit an enormous betrayal. She stood with her hand on the new paint and tried to remember what colour it had been, and found she could not. Behind her, the car ticked as it cooled. Somewhere in the house a radio was playing a song she half knew, and she thought that if she waited long enough, someone would come out and tell her what she had forgotten.

Which choice best states the main purpose of the text?

A) To explain why Marit left the farm

B) To show that Marit is angry with the farm's new owners

C) To convey Marit's disorientation on returning to a place that has changed

D) To describe the painting of the gate

8 TEXT STRUCTURE AND PURPOSE

The following text is from an original poem.

> The tide comes in and takes the names we wrote
> in sand, and does not hurry, does not pause;
> it has no quarrel with the thing we thought
> so sure of staying. Nor does it applaud.
> And we, who watched the letters fade, walk back
> along the wet-bright margin of the shore,
> a little lighter, as though what we lack
> was something we were glad to lose, once more.

Which choice best describes the overall structure of the text?

(A) The speaker describes the shore, then recalls a particular holiday.

(B) The speaker describes a natural process erasing human marks, then describes the people's response to the loss.

(C) The speaker asks a question about the tide, then answers it.

(D) The speaker states a rule about sand, then gives two examples.

9 CROSS-TEXT CONNECTIONS

TEXT 1

Some nutrition researchers maintain that eating several small meals a day keeps energy levels steady and prevents overeating. They cite studies in which participants who ate five small meals reported fewer cravings than those who ate two large ones.

TEXT 2

A dietitian who examined the same studies points out that participants' total calories were not controlled. She argues that the studies show only that people who eat more often report fewer cravings, not that the pattern of meals reduces overeating.

Based on the texts, how would the dietitian in Text 2 most likely respond to the claim in Text 1 that small meals prevent overeating?

(A) By agreeing that small meals prevent overeating in every case

(B) By noting that the studies cited do not show that small meals reduce how much people eat

(C) By recommending that people eat only two meals a day

(D) By arguing that cravings are unrelated to eating habits

10 CENTRAL IDEAS AND DETAILS

The following text is adapted from an original essay about public transport.

> Cities that have invested in frequent, reliable buses often find that ridership rises more than planners predicted. Part of the reason is simple: people value not having to check a timetable. When a bus arrives every ten minutes, a rider can leave when ready, and the service becomes something to rely on rather than plan around. Frequency, in other words, can matter as much as speed.

Which choice best states the main idea of the text?

(A) Frequent service can attract riders because it makes a bus system easier to rely on.

(B) Buses are faster than any other form of public transport.

(C) Planners rarely predict how many people will use buses.

(D) Timetables are no longer needed in modern cities.

11 CENTRAL IDEAS AND DETAILS

The following text is from an original essay about glass.

> Glass is often described as a slow-moving liquid, and the claim is repeated as evidence in the fact that old window panes are thicker at the bottom. Physicists point out that glass at room temperature is, for all practical purposes, a solid. The uneven panes are better explained by the way medieval glassmakers spun and flattened their molten discs, producing sheets of uneven thickness that glaziers set with the thicker edge down.

Which choice best states the main idea of the text?

(A) Glass flows downward at room temperature over centuries.

(B) Medieval glaziers were unskilled and set panes carelessly.

(C) Glass is neither a solid nor a liquid.

(D) A familiar explanation for uneven old window panes is mistaken, and the manufacturing method accounts for them better.

12 COMMAND OF EVIDENCE: QUANTITATIVE

Club Membership

Club	Last year	This year
Robotics	18	41
Chess	30	36
Drama	44	52

A school recorded the number of students who joined each after-school club this year. The head teacher wants to emphasise that the robotics club grew fastest.

Which choice most effectively uses data from the table to complete the statement?

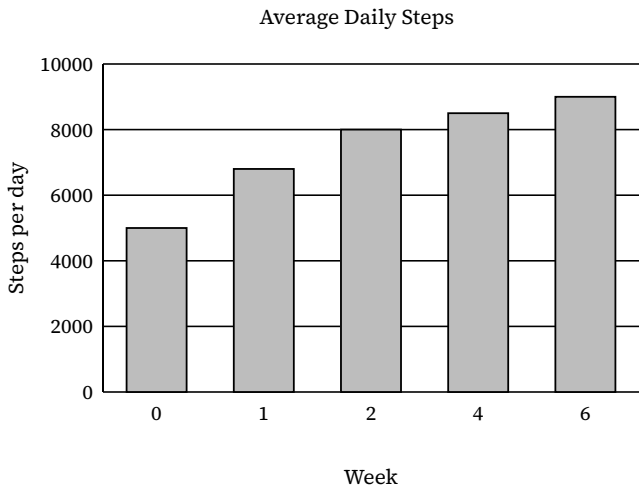

(A) Membership of the robotics club rose from 18 students to 41, and the drama club had 52 members.

(B) Membership of the chess club rose from 30 to 36 students, the smallest increase.

(C) Membership of the robotics club more than doubled, from 18 students to 41, a larger proportional increase than in either the chess or the drama club.

(D) Membership of the drama club was higher than that of the robotics club in both years.

13 COMMAND OF EVIDENCE: QUANTITATIVE

A researcher measured the average daily number of steps taken by workers at a company during a six-week programme that offered prizes for activity. She wants to claim that participation raised steps most in the first weeks.

Which choice most effectively uses data from the graph to complete the statement?

(A) average daily steps fell from 8,000 in week 2 to 5,000 in week 6.

(B) average daily steps rose steadily by 500 each week from week 0 to week 6.

(C) average daily steps were 9,000 in week 6, the highest of the programme.

(D) average daily steps rose from 5,000 in week 0 to 8,000 in week 2, but then rose by only 1,000 more over the next four weeks.

14 COMMAND OF EVIDENCE: TEXTUAL

The following text is adapted from an original essay about a philosopher.

> The philosopher Edith Clarion was suspicious of grand systems. Where her contemporaries sought a single principle that would explain all of ethics, she wrote short, particular essays about a single decision: whether to tell a friend a painful truth, or how to divide an inheritance fairly. Ethics, she argued, is learned through cases, not derived from theory.

A student claims that Clarion's method of writing reflected her philosophical view. Which quotation from the text best supports the student's claim?

A) "she wrote short, particular essays about a single decision"

B) "The philosopher Edith Clarion was suspicious of grand systems."

C) "whether to tell a friend a painful truth"

D) "Where her contemporaries sought a single principle that would explain all of ethics"

15 COMMAND OF EVIDENCE: TEXTUAL

A researcher claims that sleeping in a cooler room helps people fall asleep more quickly.

> In a laboratory study, volunteers slept on different nights in a room kept at 16 degrees Celsius and in a room kept at 24 degrees. On average, volunteers fell asleep nine minutes faster in the cooler room than in the warmer one.

Which finding from the text most directly supports the researcher's claim?

A) The volunteers slept in the laboratory on different nights.

B) Volunteers fell asleep an average of nine minutes sooner in the cooler room.

C) One room was kept at 24 degrees Celsius.

D) The study involved both a cooler and a warmer room.

16 COMMAND OF EVIDENCE: TEXTUAL

The following text is adapted from an original essay on a historian's work.

> The historian Clementine Ashby draws heavily on the letters of ordinary people. In one study of a mining town, she uses a miner's letters to show that residents were far more aware of national politics than earlier accounts had assumed, citing a letter from 1911 in which the miner discusses a parliamentary bill in detail.

Which choice best describes the evidence Ashby uses to support her claim about the residents' awareness of politics?

(A) A history of the mining town written by a local official

(B) A statistical study of the town's voting patterns

(C) A miner's letter discussing a parliamentary bill in detail

(D) Earlier accounts of the town's economy

17 INFERENCES

The following text is adapted from an original science article.

> Researchers placed identical seedlings in two greenhouses. One greenhouse was kept at a constant temperature, and the other varied by five degrees over each day. The seedlings in the varying greenhouse grew taller and developed thicker stems. This suggests that moderate daily changes in temperature

Which choice most logically completes the text?

(A) always harm the growth of seedlings.

(B) have no effect on how plants develop.

(C) may stimulate growth in these seedlings.

(D) are less important than the amount of water.

18 INFERENCES

The following text is from an original essay about museums.

> Visitors to a museum often spend longer in front of a single work when a label asks a question about it than when the label simply states facts. A curator who noticed this pattern has begun to revise the museum's labels. It seems likely that the curator believes that

Which choice most logically completes the text?

(A) questions encourage visitors to look more closely at a work.

(B) visitors dislike reading labels.

(C) facts are of no use to museum visitors.

(D) works of art should have no labels.

19 INFERENCES

The following text is adapted from an original essay about a harbour town.

> For centuries the town of Port Alder lived by its fishing fleet. When stocks collapsed in the 1990s, the fleet shrank to a handful of boats, and most of the young left to find work elsewhere. Today the harbour is lined with cafés and galleries, and visitors outnumber residents in summer. A resident who remembers the old days might reasonably observe that the town's livelihood

Which choice most logically completes the text?

(A) has not changed since the 1990s.

(B) still depends mainly on its fishing fleet.

(C) is stronger in winter than in summer.

(D) now depends on visitors rather than on the sea.

20 FORM, STRUCTURE, AND SENSE

The botanist _____ the rare orchid in a remote part of the mountains last summer.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) has discovered

(B) discovered

(C) discovers

(D) had been discovering

21 BOUNDARIES

The decision to close the school, along with the plans for relocating the pupils, _____ announced on Monday.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) was

(B) were

(C) have been

(D) are

22 BOUNDARIES

The city has several fine parks _____ the largest, Riverside Park, covers two hundred acres.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) ,

(B) :

(C) ;

(D) and

23 FORM, STRUCTURE, AND SENSE

Lena is a better swimmer than _____ .

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) me

(B) myself

(C) mine

(D) I

24 FORM, STRUCTURE, AND SENSE

The scientists conducted the experiment _____ and recorded the results in a notebook.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) careful

(B) carefully

(C) more careful

(D) with care of

25 FORM, STRUCTURE, AND SENSE

Only after the committee reviewed the evidence _____ that the claim was unfounded.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) did it conclude

(B) it concluded

(C) it does conclude

(D) concluding

26 FORM, STRUCTURE, AND SENSE

The mountain's summit was hidden in cloud, _____ the climbers continued their ascent.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) because

(B) so that

(C) but

(D) unless

27 BOUNDARIES

Marie Curie, _____ discoveries transformed physics and chemistry, won two Nobel Prizes.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) who's
B) whose
C) whom
D) that

28 TRANSITIONS

The first draft of the plan called for a single large library. _____ the final plan includes three smaller branches closer to residents.

Which choice completes the text with the most logical transition?

A) Likewise,
B) For example,
C) As a result,
D) However,

29 TRANSITIONS

Few insects are as well studied as the honeybee. _____ the habits of many solitary bees remain largely unknown.

Which choice completes the text with the most logical transition?

A) Similarly,
B) In particular,
C) Therefore,
D) By contrast,

30 TRANSITIONS

The mayor promised to reduce traffic by building a new road. _____ studies suggest that new roads often attract more cars than they remove.

Which choice completes the text with the most logical transition?

A) Thus
B) Yet
C) Namely
D) Indeed

31 RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- The Calder Footbridge crosses the River Wend in the north of England.
- It is 85 metres long.
- It replaced an older bridge washed away by floods.
- Construction began in March 2022.
- The bridge opened to the public only eleven weeks later.

The student wants to emphasise the unusual speed of a project.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) The Calder Footbridge, which replaced an older bridge washed away by floods, opened only eleven weeks after construction began.

(B) The Calder Footbridge, which crosses the River Wend, is 85 metres long.

(C) Construction of the Calder Footbridge began in March 2022.

(D) The Calder Footbridge replaced an older bridge that had been washed away.

32 RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- Nadia Solberg is a Norwegian novelist.
- Her first novel, The Quiet Fjord, appeared in 2014.
- Her books are set in small coastal communities.
- She has won two national literary prizes.
- Her work has been translated into fourteen languages.

The student wants to introduce a writer to someone who has not read her work.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) Her work has been translated into fourteen languages.

(B) The Quiet Fjord was her first novel and appeared in 2014.

(C) Nadia Solberg, a Norwegian novelist whose books are set in small coastal communities, has won two national literary prizes.

(D) A novelist with two prizes has been widely translated.

33

RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- Many tropical rainforest soils are low in nutrients.
- Most nutrients are stored in living plants rather than in the soil.
- When forests are cleared, the nutrients are lost.
- After clearing, farmland in these areas often becomes unproductive within a few years.
- Rainforests cover about six percent of Earth's land surface.

The student wants to explain a cause.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) Rainforests cover about six percent of Earth's land surface.

(B) Many tropical rainforest soils are low in nutrients.

(C) Because most nutrients in rainforest soils are stored in plants rather than in the ground, clearing the forest removes them, which is why farmland there often becomes unproductive within a few years.

(D) Farmland in cleared rainforest areas often becomes unproductive within a few years.

STOP If you finish before time is called, you may check your work on this module only. Do not turn to any other module in the test.

1 Reading and Writing Module 2

33 QUESTIONS 39 MINUTES

DIRECTIONS

The questions in this section address a number of important reading and writing skills. Each question includes one or more passages, which may include a table or graph. Read each passage and question carefully, and then choose the best answer to the question based on the passage(s).

All questions in this section are multiple-choice with four answer choices. Each question has a single best answer. Circle your answer in the booklet.

PACE YOURSELF

You have **39 minutes** for **33 questions**, which is about **71 seconds** a question. Answer what you can quickly, circle the ones that need more time, and come back to them before time is called. There is no penalty for a wrong answer, so never leave a question blank. This module is harder than Module 1.

WHAT YOU WILL SEE IN THIS MODULE

- Words in context
- Text structure and purpose
- Cross-text connections
- Central ideas and details
- Command of evidence: quantitative
- Command of evidence: textual
- Inferences
- Boundaries
- Form, structure, and sense
- Transitions
- Rhetorical synthesis

Questions 1 to 4 of 33

1 WORDS IN CONTEXT

The biographer's tone is notably _____ : she neither flatters her subject nor condemns him, setting out his decisions and their consequences and leaving readers to reach their own verdict.

Which choice completes the text with the most logical and precise word or phrase?

(A) effusive
(B) accusatory
(C) dispassionate
(D) sentimental

2 WORDS IN CONTEXT

Theirs was a _____ alliance, formed less from shared goals than from a common rival, and it dissolved the moment the rival was defeated.

Which choice completes the text with the most logical and precise word or phrase?

(A) durable
(B) venerable
(C) unanimous
(D) tenuous

3 WORDS IN CONTEXT

While the senator's speech was ostensibly a defence of free trade, its _____ purpose, critics argued, was to reassure donors who owned factories abroad.

Which choice completes the text with the most logical and precise word or phrase?

(A) stated
(B) underlying
(C) innocuous
(D) accidental

4 WORDS IN CONTEXT

The politician's remarks were intentionally _____ , so that listeners of all persuasions could hear in them something they already believed.

Which choice completes the text with the most logical and precise word or phrase?

(A) ambiguous
(B) blunt
(C) scripted
(D) unprecedented

5 WORDS IN CONTEXT

The archaeologists' find was all the more _____ because the site had been searched for decades without turning up so much as a single fragment of pottery.

Which choice completes the text with the most logical and precise word or phrase?

(A) predictable

(B) dispensable

(C) remarkable

(D) tedious

6 WORDS IN CONTEXT

Her argument is not merely clever but _____ : every objection her critics have raised is answered in the text, and the conclusion follows from the premises without any gaps.

Which choice completes the text with the most logical and precise word or phrase?

(A) airtight

(B) porous

(C) fanciful

(D) peripheral

7 TEXT STRUCTURE AND PURPOSE

The following text is adapted from an original essay about the study of memory.

> In the 1880s, the psychologist Hermann Ebbinghaus set out to measure memory by memorising lists of nonsense syllables, reasoning that meaningless items would be free of prior associations. His method was tedious and his only subject was himself, yet it produced the first quantitative description of forgetting. Later researchers would refine his curves, but the basic pattern he found, a steep early loss followed by a gentle decline, has held up.

Which choice best describes the function of the underlined sentence in the text as a whole?

(A) It dismisses Ebbinghaus's work as unscientific.

(B) It explains why Ebbinghaus chose nonsense syllables.

(C) It argues that later researchers misread Ebbinghaus's curves.

(D) It acknowledges the limits of a method while stressing the importance of its results.

8 TEXT STRUCTURE AND PURPOSE

The following text is from an original novel. Beatrix, a young archivist, has found a letter that contradicts a famous story about her city's founding.

> Beatrix read the letter a third time, as though the words might rearrange themselves. The founder had not, as every schoolchild knew, bought the land; he had been given it, and by a woman whose name appeared nowhere in the textbooks. She thought of the statue in the square, the founder's hand extended in what she had always taken for generosity. It occurred to her that the statue was not wrong, exactly; it had simply been turned to face the wrong way.

Which choice best describes the function of the final sentence in the text as a whole?

(A) It reveals that the statue was erected after the letter was written.

(B) It uses an image to suggest that a familiar story misrepresents who deserves credit.

(C) It shows that Beatrix intends to destroy the letter.

(D) It explains how the founder obtained the land.

9 TEXT STRUCTURE AND PURPOSE

The following text is from an original poem.

> I was told that the house would hold its shape,
> that walls were promises and floors were true.
> But rain has a way, and so does time, to drape
> its slow fingers over what we thought we knew.
> The beams have bowed. The doorframe will not close.
> And yet I find I love the lean of it,
> the way the evening light now comes and goes
> through gaps that no one meant, and none will fit.

Which choice best describes the overall structure of the text?

(A) The speaker describes a house's construction, then argues that it should be rebuilt.

(B) The speaker asks why a house has decayed, then blames a neighbour.

(C) The speaker reports an expectation, describes how it has been disappointed, then expresses an unexpected appreciation.

(D) The speaker compares two houses, then chooses the older one.

10 CROSS-TEXT CONNECTIONS

TEXT 1

Some historians argue that the printing press made the Reformation possible: without cheap, rapidly produced pamphlets, they say, Luther's ideas could not have reached so many people so quickly.

TEXT 2

A scholar of religious history notes that earlier reform movements also produced pamphlets, copied by hand, and that many failed to spread beyond their regions. She suggests that Luther's success owed as much to the political support of local rulers as to the press.

Based on the texts, how would the scholar in Text 2 most likely respond to the claim in Text 1?

(A) By denying that Luther's pamphlets were ever printed

(B) By arguing that the claim gives too little weight to factors other than printing

(C) By agreeing that printing alone explains the Reformation

(D) By saying that earlier reformers made no use of pamphlets

11 CENTRAL IDEAS AND DETAILS

The following text is adapted from an original science article.

> When the satellite photographs of the glacier were compared with those taken thirty years earlier, the retreat was plain: the ice front had withdrawn by almost two kilometres. But the glaciologists' main finding concerned the speed of the ice rather than its length. The flow near the front had accelerated, apparently because meltwater was lubricating the bed, and the faster flow was moving ice toward the sea more quickly than the older models had allowed.

Which choice best states the main idea of the text?

(A) The glaciologists found that the glacier's acceleration, more than its retreat, shows that ice is reaching the sea faster than earlier models allowed.

(B) Satellite photographs are the only reliable way to measure a glacier's length.

(C) The glacier has advanced by almost two kilometres in thirty years.

(D) Meltwater cannot affect the speed at which a glacier flows.

12 CENTRAL IDEAS AND DETAILS

The following text is from an original essay about copying in art.

> In the history of European painting, copying was long regarded as an honourable discipline, not a form of theft. Apprentices spent years reproducing the works of masters, and a painter who could convincingly imitate an earlier style was praised. The modern prejudice that originality means starting from nothing would have puzzled such artists, who thought of invention as the skilful reworking of what the tradition already offered.

Which choice best states the main idea of the text?

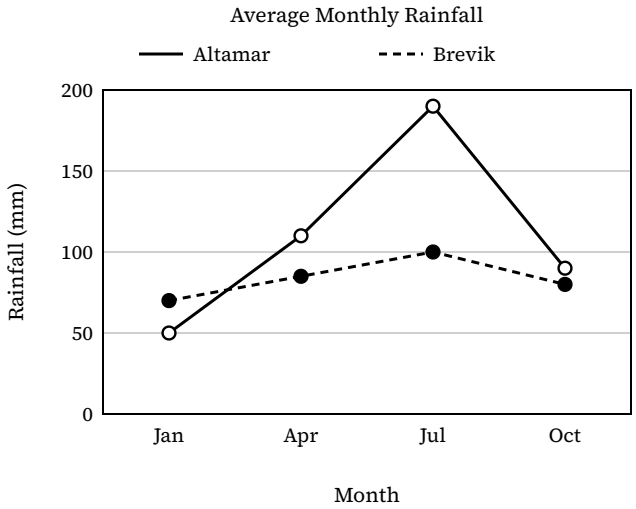

A. Apprentices were forbidden from developing their own styles.

B. Modern painters never copy the works of earlier masters.

C. Copying was once considered a form of theft by painters.

D. Earlier painters valued imitation and reworking of tradition as part of invention, unlike the modern view of originality.

13 COMMAND OF EVIDENCE: QUANTITATIVE

A researcher compared the average monthly rainfall in two cities, Altamar and Brevik, over a year. A student wants to claim that Altamar has a more pronounced wet season.

Which choice most effectively uses data from the graph to support the student's claim?

A. Rainfall in Brevik peaks at 100 millimetres in July and falls to 70 in January.

B. Rainfall in Altamar in January is 50 millimetres, lower than in Brevik.

C. Rainfall in Altamar peaks at 190 millimetres in July, almost four times its January level of 50, while Brevik's rainfall varies only between 70 and 100.

D. Rainfall in both cities is higher in July than in January.

14 COMMAND OF EVIDENCE: QUANTITATIVE

Issue Named Most Important, by Age

Age	Housing	Jobs	Health
18 to 29	46%	31%	23%
30 to 59	22%	39%	39%
60 and over	9%	18%	73%

A survey asked 500 voters which of three issues mattered most to them, by age. A pollster wants to argue that concern about housing is highest among the youngest voters.

Which choice most effectively uses data from the table to support the pollster's claim?

(A) Among voters aged 60 and over, 9 percent named housing as most important.

(B) Among voters aged 18 to 29, 46 percent named housing and 31 percent named jobs.

(C) Housing was named by 22 percent of voters aged 30 to 59, more than by those aged 60 and over.

(D) Among voters aged 18 to 29, 46 percent named housing as most important, compared with 22 percent of voters aged 30 to 59 and 9 percent of voters aged 60 and over.

15 COMMAND OF EVIDENCE: TEXTUAL

The following text is adapted from an original essay about an engineer.

> The engineer Tamsin Hale believed that safety rules are written in the aftermath of accidents and that the best preparation is therefore to study failures. She kept a file of disasters, each annotated with the small warnings that preceded it. In every case, she observed, someone had noticed that something was wrong and had been ignored.

A student claims that Hale believed disasters are usually preceded by warnings that go unheeded. Which quotation from the text best supports the student's claim?

(A) "The engineer Tamsin Hale believed that safety rules are written in the aftermath of accidents"

(B) "In every case, she observed, someone had noticed that something was wrong and had been ignored."

(C) "the best preparation is therefore to study failures"

(D) "She kept a file of disasters"

16 COMMAND OF EVIDENCE: TEXTUAL

A researcher claims that the migration of a certain butterfly is triggered by shortening days, not by falling temperature.

> In a laboratory, researchers kept butterflies at a constant warm temperature but shortened the hours of artificial daylight. The butterflies began to show migratory behaviour, such as restlessness and orientation to the south, within two weeks. A control group kept in long days at the same temperature showed no such behaviour.

Which finding from the text most directly supports the researcher's claim?

(A) Butterflies at a constant warm temperature showed migratory behaviour when daylight was shortened.

(B) The butterflies in the control group were kept at the same temperature.

(C) The behaviour appeared within two weeks.

(D) The butterflies were kept in a laboratory.

17 COMMAND OF EVIDENCE: TEXTUAL

The following text is from an original essay about the history of cooking.

> Culinary historians once credited the invention of the oven with the rise of bread-making in Europe. Archaeological work now suggests that bread was baked for centuries before such ovens appeared, in the embers of open fires and under inverted clay pots. Ovens, it seems, made bread more consistent and cheaper to produce, but they did not make it possible.

Which choice best describes the evidence the text uses to challenge the earlier view?

(A) A comparison of the cost of bread in different countries

(B) Written recipes for oven-baked bread

(C) Archaeological findings of bread baked before ovens existed

(D) A description of the shapes of clay pots

18 INFERENCES

The following text is adapted from an original essay about a lost city.

> Excavators of an ancient port noticed that its warehouses were built to a single standard plan and that the weights found in them were identical in mass, though they came from different buildings. Such uniformity is hard to explain if each merchant set his own measures. The finding suggests that the port

Which choice most logically completes the text?

(A) was abandoned shortly after its warehouses were built.

(B) was governed by an authority that regulated weights and measures.

(C) was used only by merchants from a single family.

(D) traded only in goods that were sold by weight.

19 INFERENCES

The following text is from an original science article.

> Bees that were trained to find sugar water in a maze took longer to reach it when the maze's walls were changed from striped to plain, though the route remained the same. This suggests that the bees were navigating partly by

Which choice most logically completes the text?

(A) the smell of the sugar water alone.

(B) the sound of other bees in the maze.

(C) memory of the maze's temperature.

(D) visual cues on the walls.

20 INFERENCES

The following text is adapted from an original essay about a company.

> For years, the company's board resisted calls to publish its salary figures, arguing that the information was private. Last month, after a survey found that its female staff were paid on average 14 percent less than male staff in equivalent roles, the board reversed itself. It appears that the board

Which choice most logically completes the text?

(A) had been concerned that publishing the figures would reveal an unfavourable pattern.

(B) has never disagreed with the survey's findings.

(C) was unaware that its salaries were being compared.

(D) wanted to reduce the pay of its male staff.

21 BOUNDARIES

The recipe requires only three ingredients _____ flour, water and salt.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) ;

(B) :

(C) ,

(D) .

22 BOUNDARIES

The stories in the collection, many of which _____ first published in magazines, were revised for the book.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) was

(B) is

(C) were

(D) being

23 FORM, STRUCTURE, AND SENSE

Having completed the survey, _____

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) the team presented its data to the council.

(B) the data were presented by the team to the council.

(C) the council received the team's presentation of data.

(D) a presentation of data was made to the council.

24 FORM, STRUCTURE, AND SENSE

The new guidelines apply to _____ work with children.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) anyone who
B) whoever
C) those whom
D) those who

25 FORM, STRUCTURE, AND SENSE

The cheetah, the fastest of all land animals, _____ short bursts of speed rather than sustained chases.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) rely on
B) relies on
C) relying on
D) to rely on

26 BOUNDARIES

If the weather were to improve, the expedition _____ set out by Friday.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) can
B) will have
C) could
D) had

27 FORM, STRUCTURE, AND SENSE

She is one of those scientists who _____ every claim before accepting it.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) tests
B) is testing
C) has tested
D) test

28 TRANSITIONS

The village has no school, no clinic and no shop. _____ its residents say they would not live anywhere else.

Which choice completes the text with the most logical transition?

(A) Still,

(B) Therefore,

(C) Similarly,

(D) In short,

29 TRANSITIONS

The first experiment appeared to confirm the hypothesis. _____ repeated trials by other laboratories failed to reproduce the result.

Which choice completes the text with the most logical transition?

(A) Accordingly,

(B) Likewise,

(C) Subsequently,

(D) Namely,

30 TRANSITIONS

Studies show that people overestimate how often they will use a gym membership. _____ the average member visits far less than expected, and many stop going within months.

Which choice completes the text with the most logical transition?

(A) On the other hand,

(B) For instance,

(C) Otherwise,

(D) In fact,

31 RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- A total solar eclipse occurs when the moon fully covers the sun.
- On average, a given location on Earth sees one about once every 375 years.
- The most recent eclipse crossed North America in 2024.
- Eclipses are visible only in a narrow band of the Earth's surface.
- The next will cross Spain in 2026.

The student wants to emphasise how rare a natural event is.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) On average, a given location on Earth sees a total solar eclipse only about once every 375 years.

(B) Total solar eclipses occur when the moon fully covers the sun.

(C) The most recent total solar eclipse crossed North America in 2024.

(D) Eclipses are visible only in a narrow band of the Earth's surface.

32 RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- Both Li Mei and Sofia Rinaldi wrote sonnets.
- Li Mei's sonnets follow a strict rhyme scheme.
- Rinaldi's sonnets rarely rhyme.
- Li Mei published in 1920.
- Rinaldi published in 1990.

The student wants to compare two poets' use of a form.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) Li Mei published her sonnets in 1920, and Rinaldi published hers in 1990.

(B) Although both poets wrote sonnets, Li Mei's follow a strict rhyme scheme, whereas Rinaldi's rarely rhyme.

(C) Both Li Mei and Sofia Rinaldi wrote sonnets.

(D) Rinaldi's sonnets rarely rhyme.

33

RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- A study followed 3,000 adults for ten years.
- Participants who walked daily had a 20 percent lower rate of heart disease.
- All participants lived in one city.
- The study was funded by a health charity.
- The researchers recorded participants' diets.

The student wants to present a finding and a limitation of a study.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) A ten-year study of 3,000 adults found that daily walkers had a 20 percent lower rate of heart disease, though all of the participants lived in one city.

(B) A study of 3,000 adults, funded by a health charity, followed them for ten years.

(C) Daily walkers had a 20 percent lower rate of heart disease, and the researchers recorded diets.

(D) All participants lived in one city and were followed for ten years.

STOP If you finish before time is called, you may check your work on this module only. Do not turn to any other module in the test.

2 Math

27 QUESTIONS 43 MINUTES

DIRECTIONS

The questions in this section address a number of important math skills. Use of a calculator is permitted for all questions.

NOTES

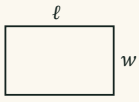

Unless otherwise indicated:

- All variables and expressions represent real numbers.
- Figures provided are drawn to scale.
- All figures lie in a plane.
- The domain of a given function f is the set of all real numbers x for which $f(x)$ is a real number.

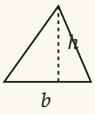

REFERENCE

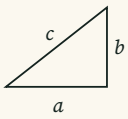

$A = \pi r^2$
$C = 2\pi r$

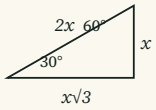

$A = \ell w$

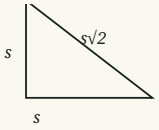

$A = \frac{1}{2}bh$

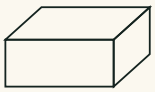

$c^2 = a^2 + b^2$

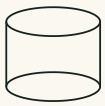

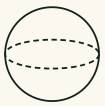

Special right triangles

$V = \ell wh$

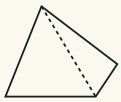

$V = \pi r^2 h$

$V = \frac{4}{3}\pi r^3$

$V = \frac{1}{3}\pi r^2 h$

$V = \frac{1}{3}\ell wh$

The number of degrees of arc in a circle is 360. The number of radians of arc in a circle is 2π. The sum of the measures in degrees of the angles of a triangle is 180.

ANSWERING THE QUESTIONS

For multiple-choice questions, solve each problem, choose the correct answer from the choices provided, and then circle your answer in the booklet. Circle only one answer for each question. If you change your mind, completely erase the circle. You will not get credit for questions with more than one answer circled, or for questions with no answers circled.

For student-produced response questions, solve each problem and write your answer in the box under the question.

- If you find **more than one correct answer,** write only one answer.
- Your answer can be up to 5 characters for a **positive** answer and up to 6 characters (including the negative sign) for a **negative** answer, but no more.
- If your answer is a **fraction** that is too long, write the decimal equivalent.
- If your answer is a **decimal** that is too long, truncate it or round at the fourth digit.
- If your answer is a **mixed number** (such as 3½), write it as an improper fraction (7/2) or its decimal equivalent (3.5).
- Do not include **symbols** such as a percent sign, comma, or dollar sign in your answer.

PACE YOURSELF

You have **43 minutes** for **27 questions**, which is about **96 seconds** a question. Answer what you can quickly, circle the ones that need more time, and come back to them before time is called. There is no penalty for a wrong answer, so never leave a question blank.

WHAT YOU WILL SEE IN THIS MODULE

Percentages | Data analysis | Linear equations | Linear equations in context | Systems of equations | Functions | Nonlinear expressions | Triangles | Circles | Quadratics | Probability | Statistics | Scatterplots | Inequalities | Exponential functions | Linear functions | Percent change | Volume | Right triangles | Ratios and rates | Area

Questions 1 to 5 of 27

1 PERCENTAGES

What is 45% of 400?

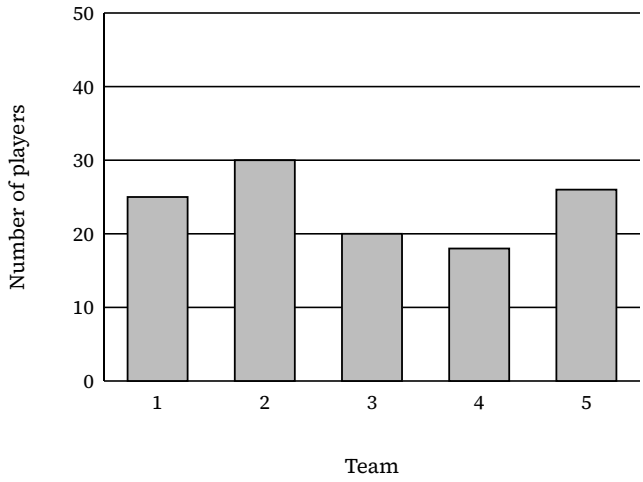

A) 220

B) 180

C) 360

D) 445

2 DATA ANALYSIS

The bar graph shows the number of players in each of five teams. How many more players does Team 1 have than Team 4?

A) 43

B) 17

C) 25

D) 7

3 LINEAR EQUATIONS

If $6x - 11 = 3x + 4$, what is the value of x?

A) 7

B) 30

C) 5

D) 10

4 LINEAR EQUATIONS IN CONTEXT

A streaming service charges a $28 activation fee plus $25 per month. Which equation gives the total cost y, in dollars, of a subscription for m months?

A) $y = 25m + 28$

B) $y = 28m + 25$

C) $y = 53m$

D) $y = 25m - 28$

5 SYSTEMS OF EQUATIONS

$x + y = 24$
$x - y = 4$

What is the value of y?

A) 10

B) 14

C) 24

D) 4

6

FUNCTIONS

x	1	2	3	4
f(x)	12	16	20	24

The table shows four values of the linear function f. Which equation defines f?

A $f(x) = 8x + 4$

B $f(x) = 4x + 12$

C $f(x) = 12x$

D $f(x) = 4x + 8$

7

NONLINEAR EXPRESSIONS

Which expression is equivalent to $(4x^2)(5x^4)$?

A $9x^6$

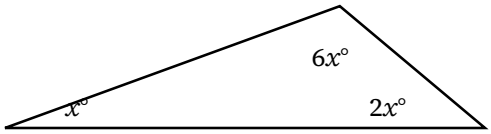

B $20x^6$

C $20x^8$

D $9x^8$

8

TRIANGLES

In the triangle shown, the three angles measure $x°$, $2x°$, $6x°$. What is the value of x?

A 15

B 30

C 20

D 60

9

CIRCLES

A circle has a circumference of 12π centimetres. What is the area of the circle, in square centimetres?

A 12π

B 6π

C 144π

D 36π

10 QUADRATICS

What are the solutions to $x^2 - 6x - 16 = 0$?

A) 8 and 2

B) −8 and −2

C) −2 and 8

D) −8 and 2

11 PROBABILITY

How Students Travel to School

	Walk	Bike	Bus
Grade 9	24	21	13
Grade 10	10	17	30

The table shows how 115 students travel to school. If one student who goes by bike is chosen at random, what is the probability that the student is in Grade 10?

A) $\frac{17}{38}$

B) $\frac{17}{115}$

C) $\frac{21}{38}$

D) $\frac{38}{115}$

12 STATISTICS

The mean of 6 test scores is 80. A score of 94 is added. What is the mean of all 7 scores?

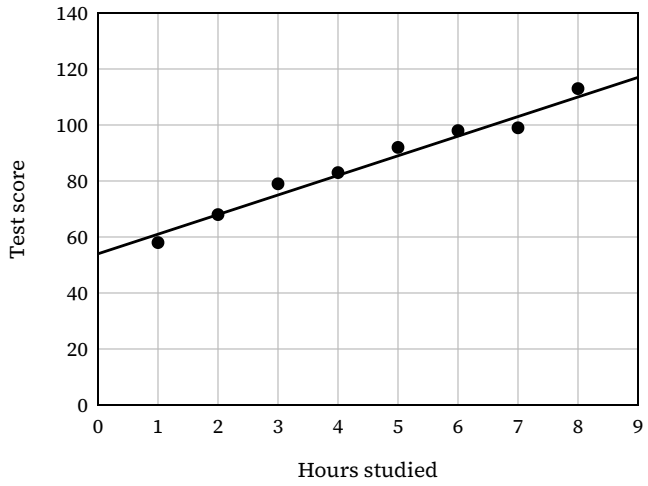

A) 87

B) 82

C) 81

D) 85

13 SCATTERPLOTS

The scatterplot shows the hours students studied and their test scores. The line of best fit is $y = 7x + 54$. According to the line, what is the predicted score for a student who studies 7 hours?

A) 49

B) 96

C) 68

D) 103

14 INEQUALITIES

A club needs at least 200 members to enter a competition, and 36 have already joined. If 15 new members join each week, which inequality represents the number of weeks, w, needed to reach the goal?

A) $36 + 15w \geq 200$

B) $36 + 15w \leq 200$

C) $15 + 36w \geq 200$

D) $200 + 15w \geq 36$

15 FUNCTIONS

The function f is defined by $f(x) = 4x^2 - 6x + 6$. What is the value of $f(3)$?

A) 60

B) 24

C) 0

D) 30

16 EXPONENTIAL FUNCTIONS

A population of bacteria triples every 2 hours. There are 500 bacteria at the start. Which function gives the number of bacteria after t hours?

A) $P(t) = 500(3)^{2t}$

B) $P(t) = 500(2)^{t/3}$

C) $P(t) = 500(3)^{t/2}$

D) $P(t) = 1500(t/2)$

17 LINEAR FUNCTIONS

A line in the xy-plane passes through the points (3, 20) and (7, 40). Which equation represents the line?

A) $y = 6x + 5$

B) $y = 5x + 7$

C) $y = 4x - 5$

D) $y = 5x + 5$

18 PERCENT CHANGE

A town's population grew from 6,000 to 7,800. By what percent did the population increase?

A) 35%

B) 30%

C) 60%

D) 23%

19 VOLUME

A cylinder has a radius of 6 centimetres and a height of 9 centimetres. What is its volume, in cubic centimetres?

A) 108π

B) 54π

C) 324π

D) 972π

20 RIGHT TRIANGLES

A right triangle has legs of length 6 and 8. What is the length of its hypotenuse?

(A) 10

(B) 14

(C) 100

(D) 2

21 LINEAR EQUATIONS

If $\frac{2}{3}$ of a number is 16, what is the number?

Write your answer

22 LINEAR EQUATIONS

If $5(x - 3) = 8x - 33$, what is the value of x?

Write your answer

23 RATIOS AND RATES

A car travels 288 miles on 6 gallons of fuel. At the same rate, how many gallons are needed to travel 288 miles?

Write your answer

24 AREA

What is the area, in square units, of a triangle with a base of 16 and a height of 10?

Write your answer

25 SYSTEMS OF EQUATIONS

The sum of two numbers is 26, and their difference is 4. What is the larger of the two numbers?

Write your answer

26 VOLUME

A cylinder has a radius of 3 and a height of 7. Its volume is $k\pi$. What is the value of k?

Write your answer

27 FUNCTIONS

The function f is defined by $f(x) = 3x - 8$. If $f(a) = 1$, what is the value of a?

Write your answer

STOP If you finish before time is called, you may check your work on this module only. Do not turn to any other module in the test.

2 Math Module 2

27 QUESTIONS 43 MINUTES

DIRECTIONS

The questions in this section address a number of important math skills. Use of a calculator is permitted for all questions.

NOTES

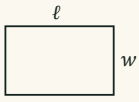

Unless otherwise indicated:

- All variables and expressions represent real numbers.
- Figures provided are drawn to scale.
- All figures lie in a plane.
- The domain of a given function f is the set of all real numbers x for which $f(x)$ is a real number.

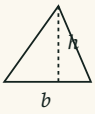

REFERENCE

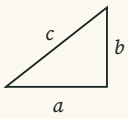

$A = \pi r^2$
$C = 2\pi r$

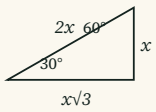

$A = \ell w$

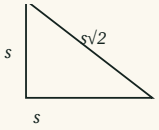

$A = \frac{1}{2}bh$

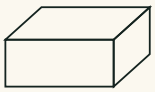

$c^2 = a^2 + b^2$

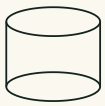

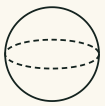

Special right triangles

$V = \ell wh$

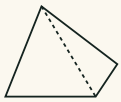

$V = \pi r^2 h$

$V = \frac{4}{3}\pi r^3$

$V = \frac{1}{3}\pi r^2 h$

$V = \frac{1}{3}\ell wh$

The number of degrees of arc in a circle is 360. The number of radians of arc in a circle is 2π. The sum of the measures in degrees of the angles of a triangle is 180.

Questions 1 to 4 of 27

1 LINEAR FUNCTIONS

A line in the xy-plane passes through the points (3, 11) and (7, 27). Which equation represents the line?

A) $y = 5x - 1$

B) $y = 4x + 1$

C) $y = 4x - 1$

D) $y = 3x + 1$

2 PERCENTAGES

What is 80% of 200?

A) 160

B) 40

C) 320

D) 280

3 PROBABILITY

How Students Travel to School

	Walk	Bike	Bus
Grade 9	30	27	12
Grade 10	14	10	18

The table shows how 111 students travel to school. If one student who goes by bus is chosen at random, what is the probability that the student is in Grade 10?

A) $\frac{18}{111}$

B) $\frac{3}{5}$

C) $\frac{12}{30}$

D) $\frac{30}{111}$

4 EXPONENTIAL FUNCTIONS

A population of bacteria triples every 4 hours. There are 500 bacteria at the start. Which function gives the number of bacteria after t hours?

A) $P(t) = 500(3)^{4t}$

B) $P(t) = 500(4)^{t/3}$

C) $P(t) = 1500(t/4)$

D) $P(t) = 500(3)^{t/4}$

5 QUADRATICS

What are the solutions to $x^2 + 2x - 8 = 0$?

A) 2 and 4

B) −4 and 2

C) −2 and −4

D) −2 and 4

6 VOLUME

A cylinder has a radius of 5 centimetres and a height of 10 centimetres. What is its volume, in cubic centimetres?

A) 100π

B) 50π

C) 250π

D) 750π

7 INEQUALITIES

A club needs at least 150 members to enter a competition, and 48 have already joined. If 20 new members join each week, which inequality represents the number of weeks, w, needed to reach the goal?

A) $48 + 20w \geq 150$

B) $48 + 20w \leq 150$

C) $20 + 48w \geq 150$

D) $150 + 20w \geq 48$

8 EXPONENTIAL FUNCTIONS

$V(x) = 4{,}000(0.7)^{x/6}$

The function V gives the value, in dollars, of a certain machine x months after it is purchased. By what percent does the value of the machine decrease each year?

A) 70%

B) 30%

C) 49%

D) 51%

9 CIRCLES

A sector of a circle has a radius of 9 and a central angle of $\frac{\pi}{3}$ radians. What is the length of the arc of the sector?

A) 9π

B) 27π

C) 18π

D) 3π

10 EQUIVALENT EXPRESSIONS

Which expression is equivalent to $(4x + 3)^2 - (3x - 1)^2$?

A) $7x^2 + 18x + 8$

B) $7x^2 + 30x + 10$

C) $7x^2 + 30x + 8$

D) $25x^2 + 30x + 8$

11 PERCENTAGES

The price of an item is raised by 25%. Later, the new price is reduced by 20%. Compared with the original price, the final price is

A) 0% higher

B) 5% higher

C) 45% lower

D) the same as the original price

12 ABSOLUTE VALUE

How many integers x satisfy the inequality $|x - 5| \leq 4$?

A) 8

B) 9

C) 5

D) 4

13 EXPONENTIAL EQUATIONS

If $2^{x+5} = 4^{x-4}$, what is the value of x?

A) 9

B) 13

C) 3

D) 15

14 CIRCLES IN THE PLANE

The equation $(x - 4)^2 + (y + 1)^2 = 64$ represents circle A in the xy-plane. Circle B is obtained by shifting circle A 3 units left and 5 units down. Which of the following equations represents circle B?

A) $(x - 1)^2 + (y + 6)^2 = 64$

B) $(x - 7)^2 + (y + 6)^2 = 64$

C) $(x - 1)^2 + (y - 4)^2 = 64$

D) $(x - 7)^2 + (y - 4)^2 = 64$

15 QUADRATICS

The function f is defined by $f(x) = x^2 - 8x + 9$. What is the minimum value of f?

A) 7

B) 9

C) 4

D) -7

16 PERCENTAGES

180 is p% greater than 30. What is the value of p?

A) 600

B) 83

C) 500

D) 150

17 FUNCTIONS

The functions f and g are defined by $f(x) = 4x + 4$ and $g(x) = x^2 + 4$. What is the value of $f(g(2)) - g(f(2))$?

A) 184

B) 96

C) 112

D) −112

18 TRIGONOMETRY

In a right triangle, angle A is acute and $\sin A = \frac{8}{17}$. What is the value of $\tan A$?

A) $\frac{15}{17}$

B) $\frac{8}{15}$

C) $\frac{15}{8}$

D) $\frac{17}{8}$

19 RATIOS AND RATES

One pump can fill a tank in 12 hours, and a second pump can fill it in 6 hours. Working together, how many hours do the two pumps take to fill the tank?

A) 9

B) 18

C) 4

D) 6

20 EQUIVALENT EXPRESSIONS

Which expression is equivalent to $\frac{x^2 - 10x + 24}{x - 4}$, where $x \neq 4$?

A) $x - 6$

B) $x + 6$

C) $x - 4$

D) $x - 24$

21 SYSTEMS OF EQUATIONS

The sum of two numbers is 35, and their difference is 17. What is the larger of the two numbers?

Write your answer

22 QUADRATICS

$2x^2 - 22x + 56 = 0$

What is the sum of the solutions to the given equation?

Write your answer

23 PERCENTAGES

A solution that is 20% acid is mixed with a solution that is 80% acid to make a mixture that is 40% acid. If 10 litres of the 80% solution are used, how many litres of the 20% solution are needed?

Write your answer

Questions 24 to 27 of 27

24 SYSTEMS OF EQUATIONS

$2x + 3y = 33$
$3x + 2y = 37$

The solution to the given system of equations is (x, y). What is the value of $x + y$?

Write your answer

25 SIMILAR TRIANGLES

Triangle ABC is similar to triangle DEF, where A corresponds to D and B corresponds to E. In triangle ABC, AB = 3, BC = 7 and AC = 5. In triangle DEF, DE = 9. What is the perimeter of triangle DEF?

Write your answer

26 QUADRATICS

The equation $x^2 + bx + 25 = 0$, where b is a positive constant, has exactly one real solution. What is the value of b?

Write your answer

27 SYSTEMS WITH NONLINEAR EQUATIONS

$y = x^2 + 2x + 4$
$y = 8x + k$

In the given system of equations, k is a constant. If the system has exactly one solution, what is the value of k?

STOP If you finish before time is called, you may check your work on this module only. Do not turn to any other module in the test.

Module 2

1	A	B	C	D
2	A	B	C	D
3	A	B	C	D
4	A	B	C	D
5	A	B	C	D
6	A	B	C	D
7	A	B	C	D
8	A	B	C	D
9	A	B	C	D
10	A	B	C	D
11	A	B	C	D
12	A	B	C	D
13	A	B	C	D
14	A	B	C	D
15	A	B	C	D
16	A	B	C	D
17	A	B	C	D
18	A	B	C	D
19	A	B	C	D
20	A	B	C	D
