TT-SAT-05

SAT-STYLE PRACTICE SERIES

SAT *Practice Test*

Digital format, printed. Sit it in one go, on the clock, then mark it and learn from every miss.

4	120	164
MODULES	QUESTIONS	MINUTES

Before you start

- [ ] A sharp pencil, an eraser, and a watch or timer
- [ ] A calculator for the two Math modules
- [ ] A quiet table and about 184 minutes with no interruptions
- [ ] Circle your answers in this booklet, or use the answer sheet at the back

MODULE	QUESTIONS	TIME
Reading and Writing, Module 1	33	39 min
Reading and Writing, Module 2 (harder)	33	39 min
Math, Module 1 (calculator permitted)	27	43 min
Math, Module 2 (harder)	27	43 min

Every question in this test is original and written by Testiddle. It follows the common patterns of the real exam but is not affiliated with, or endorsed by, any exam provider.

Test begins on the next page.

Start your timer now.

1 Reading and Writing

33 QUESTIONS 39 MINUTES

DIRECTIONS

The questions in this section address a number of important reading and writing skills. Each question includes one or more passages, which may include a table or graph. Read each passage and question carefully, and then choose the best answer to the question based on the passage(s).

All questions in this section are multiple-choice with four answer choices. Each question has a single best answer. Circle your answer in the booklet.

PACE YOURSELF

You have **39 minutes** for **33 questions**, which is about **71 seconds** a question. Answer what you can quickly, circle the ones that need more time, and come back to them before time is called. There is no penalty for a wrong answer, so never leave a question blank.

WHAT YOU WILL SEE IN THIS MODULE

- Words in context
- Text structure and purpose
- Central ideas and details
- Cross-text connections
- Command of evidence: quantitative
- Command of evidence: textual
- Inferences
- Boundaries
- Form, structure, and sense
- Transitions
- Rhetorical synthesis

Questions 1 to 4 of 33

1 WORDS IN CONTEXT

The hikers were _____ when the trail, which the map had shown as a gentle path, turned out to climb steeply for nearly an hour.

Which choice completes the text with the most logical and precise word or phrase?

(A) delighted
(B) indifferent
(C) relieved
(D) dismayed

2 WORDS IN CONTEXT

The sculptor chose to work in marble because it is _____ : carved stone can survive for thousands of years, long after wood or clay have crumbled.

Which choice completes the text with the most logical and precise word or phrase?

(A) durable
(B) fragile
(C) affordable
(D) portable

3 WORDS IN CONTEXT

The speaker's cheerful manner _____ the seriousness of her message; the audience left feeling hopeful, though the news she had delivered was grim.

Which choice completes the text with the most logical and precise word or phrase?

(A) underscored
(B) belied
(C) reflected
(D) exaggerated

4 WORDS IN CONTEXT

Though the first volume of the encyclopedia was received with _____ , the later volumes, which contained several errors, were criticised in the press.

Which choice completes the text with the most logical and precise word or phrase?

(A) scorn
(B) confusion
(C) acclaim
(D) suspicion

5 WORDS IN CONTEXT

The negotiator remained _____ even when the other delegation raised its voice, answering each accusation in the same calm tone.

Which choice completes the text with the most logical and precise word or phrase?

(A) agitated

(B) boastful

(C) composed

(D) evasive

6 TEXT STRUCTURE AND PURPOSE

The following text is adapted from an original science article.

> Fireflies flash in patterns that are specific to each species. A male of one species, for example, emits a single long flash every few seconds, whereas another produces a rapid series of short pulses. Females respond only to the pattern of their own species, which prevents them from wasting time on males that cannot father their offspring.

Which choice best describes the function of the underlined sentence in the text as a whole?

(A) It disputes the claim that fireflies flash in patterns.

(B) It provides examples of the species-specific patterns mentioned in the previous sentence.

(C) It explains why female fireflies do not flash.

(D) It describes how male fireflies compete for food.

7 TEXT STRUCTURE AND PURPOSE

The following text is from an original short story. Isidore has been asked to give a speech at his retirement dinner.

> Isidore had written the speech three times and burned two of them. The third lay folded in his jacket, and he could feel it there as he stood, like a stone in a shoe. Forty years of ledgers and no one in the room had ever asked him what he thought about anything but numbers. He cleared his throat, and a hush fell, and he realised, with a surprise that was almost joy, that he did not need the paper at all.

Which choice best states the main purpose of the text?

(A) To show a character's movement from anxiety to unexpected confidence

(B) To explain the career that Isidore had before retiring

(C) To criticise the people attending the dinner

(D) To show that Isidore is unprepared for the occasion

8 TEXT STRUCTURE AND PURPOSE

The following text is from an original poem.

> The bus is late. The rain has made a map
> of every window, each small river racing
> to join another. I hold my coat, my cap,
> my ticket, and the habit of just facing
> the road. A woman near me hums a tune
> I almost know. A child draws on the glass.
> It seems that waiting, like the afternoon,
> is something that we do and let go past.

Which choice best describes the overall structure of the text?

(A) The speaker complains about a delay, then demands an apology.

(B) The speaker describes a journey, then arrives at a destination.

(C) The speaker recalls a childhood memory, then compares it with the present.

(D) The speaker observes a scene of waiting, then reflects on what the experience suggests.

9 CENTRAL IDEAS AND DETAILS

The following text is adapted from an original essay about coffee.

> Coffee drinkers often say that they feel more alert after a cup, and the caffeine in it is widely credited for this. But researchers who gave regular drinkers either caffeine or an identical-tasting decaffeinated drink found that much of the benefit disappeared in those who were not told what they had been given and who had gone without caffeine for a day. The effect of the first cup, the researchers concluded, is largely the relief of withdrawal rather than a true boost.

Which choice best states the main idea of the text?

(A) Much of the alertness regular drinkers feel from coffee may come from relief of withdrawal rather than a real boost.

(B) Decaffeinated coffee is more effective than regular coffee.

(C) Coffee drinkers are always aware of the amount of caffeine they take.

(D) Caffeine has no effect on anyone who drinks it.

10 CENTRAL IDEAS AND DETAILS

The following text is from an original essay about the history of a language.

> English has borrowed words from dozens of languages, and many of them arrived with the foods they named: pasta from Italian, kebab from Turkish, ketchup from a Chinese dialect. Yet borrowing is rarely a one-way street. Words that travelled in the opposite direction, such as the English football and computer, are now heard in languages around the world, often adapted to local sounds.

Which choice best states the main idea of the text?

(A) English has borrowed more words than any other language.

(B) Foods are named more often than other things in English.

(C) English both borrows words from other languages and lends words to them.

(D) English words are never changed when they are borrowed.

11 CROSS-TEXT CONNECTIONS

TEXT 1

Some urban planners argue that cities should limit building heights to preserve neighbourhood character. They say that low-rise streets encourage walking and give residents a sense of belonging.

TEXT 2

An economist who studies housing argues that height limits restrict the supply of homes in cities where demand is high, driving up prices. She suggests that cities could protect character through design rules while still permitting taller buildings.

Based on the texts, how would the economist in Text 2 most likely respond to the planners' proposal in Text 1?

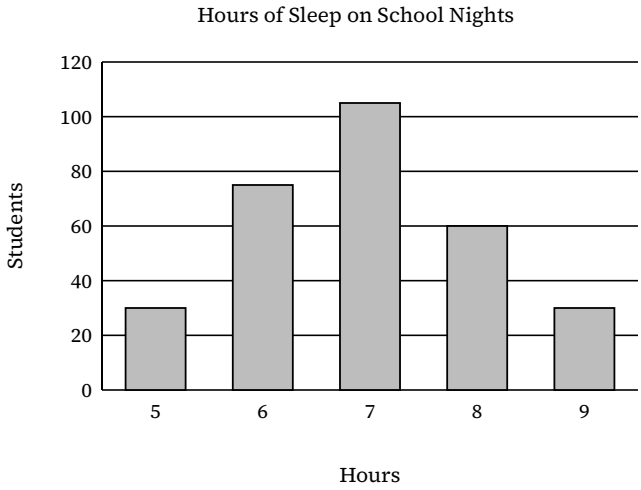

(A) By agreeing that height limits are the best way to preserve character

(B) By arguing that cities should ignore neighbourhood character entirely

(C) By claiming that low-rise streets discourage walking

(D) By saying that height limits have costs that the planners do not consider and that other measures could protect character

12 COMMAND OF EVIDENCE: QUANTITATIVE

A school surveyed 300 students about how many hours they sleep on school nights. A counsellor wants to emphasise that most students get fewer than eight hours.

Which choice most effectively uses data from the graph to complete the statement?

(A) Of the 300 students surveyed, 90 reported sleeping eight or more hours on school nights, which is 30 percent.

(B) Of the 300 students surveyed, 210 reported sleeping fewer than eight hours on school nights, which is 70 percent.

(C) Of the 300 students surveyed, 75 reported sleeping six hours, more than for any other length.

(D) Of the 300 students surveyed, 120 reported sleeping seven hours on school nights.

13 COMMAND OF EVIDENCE: QUANTITATIVE

Noise Complaints by District

District	Before rule	After rule
Harbour	64	21
Old town	41	35
North	12	9
Station	28	17

A town council recorded the number of complaints about noise in four districts before and after a new rule on night-time construction. A councillor wants to claim that the rule reduced complaints in every district.

Which choice most effectively uses data from the table to support the councillor's claim?

(A) Complaints fell in the harbour district from 64 to 21 and in the old town from 41 to 35.

(B) Complaints fell in all four districts, with the largest drop in the harbour district, from 64 to 21.

(C) Complaints in the harbour district fell by 43, the largest drop of the four districts.

(D) Complaints rose in the north district from 12 to 15 after the rule.

14 COMMAND OF EVIDENCE: TEXTUAL

The following text is adapted from an original essay about a naturalist.

> The naturalist Greta Lindqvist spent a summer watching a single colony of ants. She found that when the colony's food supply was reduced, a few ants began to leave the trail and explore new routes, and when one of them found food, others quickly followed. Lindqvist suggested that the colony's flexibility depends on a minority of individuals willing to deviate from the group.

A student claims that Lindqvist found that changes in the colony's circumstances prompted exploration. Which quotation from the text best supports the student's claim?

A "The naturalist Greta Lindqvist spent a summer watching a single colony of ants."

B "when one of them found food, others quickly followed"

C "when the colony's food supply was reduced, a few ants began to leave the trail and explore new routes"

D "Lindqvist suggested that the colony's flexibility depends on a minority of individuals"

15 COMMAND OF EVIDENCE: TEXTUAL

A researcher claims that listening to music while exercising improves endurance.

> In an experiment, 40 runners ran on a treadmill until exhausted, once with music and once in silence. On average, runners lasted 12 percent longer when music was played.

Which finding from the text most directly supports the researcher's claim?

A Forty runners took part in the experiment.

B Each runner ran on a treadmill.

C Each runner ran once with music and once in silence.

D Runners lasted 12 percent longer on average when music was playing.

16 COMMAND OF EVIDENCE: TEXTUAL

The following text is from an original essay about a bridge.

> When the cable-stayed bridge opened, engineers noticed that the longest cables vibrated in light rain. Later tests in a wind tunnel showed that water running down the cables formed rivulets that changed their shape and set them oscillating. A ridged coating that breaks up the rivulets was added, and the vibrations stopped.

Which choice best describes the evidence that the rivulets were the cause of the vibrations?

(A) The vibrations stopped after a coating that disrupts rivulets was added.

(B) The cables were the longest on the bridge.

(C) The bridge opened to the public.

(D) The vibrations appeared in light rain.

17 INFERENCES

The following text is adapted from an original science article.

> Large herbivores such as elephants push over trees and strip bark, which can look like damage. Yet researchers who excluded elephants from fenced plots in a savanna found that, after a decade, the plots had fewer species of small plants and fewer insects than unfenced ground nearby. This suggests that elephants, by disturbing vegetation,

Which choice most logically completes the text?

(A) destroy the habitats of insects.

(B) have little effect on plants in the savanna.

(C) may help maintain the diversity of life in a savanna.

(D) are less important than rainfall.

18 INFERENCES

The following text is from an original essay about a shop.

> The bookshop on Ferry Street had never advertised, and for thirty years its owner insisted that it did not need to. Then the owner died, and the shop closed within a month. Customers recalled that they had come not for any particular title but for the owner's recommendations. It seems that the shop's success depended largely on

Which choice most logically completes the text?

(A) its low prices.

(B) the owner's personal knowledge and relationships with customers.

(C) a large stock of rare books.

(D) advertisements in local newspapers.

19 INFERENCES

The following text is adapted from an original essay about a language.

> Linguists studying a village in the mountains found that the old and young speak differently: elderly speakers distinguish three vowel sounds that younger speakers pronounce as one. Children, the linguists note, learn vowels mainly from their peers rather than from their grandparents, and most young people in the village now attend school in the nearby town. This pattern suggests that the vowel merger is likely to

Which choice most logically completes the text?

(A) disappear when the elderly speakers die.

(B) be confined to the oldest speakers.

(C) be reversed when children learn from their grandparents.

(D) spread as the young people's way of speaking becomes the norm.

20 BOUNDARIES

The orchestra's performance of the symphony, which lasted nearly an hour _____ left the audience silent for several seconds.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) ,

(B) ;

(C) :

(D) .

21 FORM, STRUCTURE, AND SENSE

The data _____ that the population of the island has doubled since 1990.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) shows
(B) has shown
(C) show
(D) is showing

22 FORM, STRUCTURE, AND SENSE

Fatima has studied violin, piano, and _____ .

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) to sing
(B) sings
(C) she sings
(D) singing

23 FORM, STRUCTURE, AND SENSE

The hikers carried _____ gear in their packs.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) their
(B) there
(C) they're
(D) its

24 BOUNDARIES

The curator, _____ the museum's collection of manuscripts, retired last year.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) whom oversaw
(B) who oversaw
(C) overseeing who
(D) she oversaw

25 FORM, STRUCTURE, AND SENSE

The company announced _____ it would open a new factory.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) what
B) because
C) that
D) whom

26 FORM, STRUCTURE, AND SENSE

Many of the students _____ their projects to the fair last Saturday.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) brung
B) brought
C) bringed
D) have brought

27 BOUNDARIES

The report was thorough; _____ it left several important questions unanswered.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) therefore,
B) for example,
C) likewise,
D) nevertheless,

28 TRANSITIONS

The restaurant has a reputation for excellent food. _____ its service is often slow, and some diners have left before their meals arrived.

Which choice completes the text with the most logical transition?

A) However,
B) Therefore,
C) Similarly,
D) Thus,

29 TRANSITIONS

The islanders have fished these waters for generations. _____ they have learned to read the weather from the colour of the sea at dawn.

Which choice completes the text with the most logical transition?

A) Over time,

B) In contrast,

C) Even so,

D) For instance,

30 TRANSITIONS

The software update promises faster performance. _____ early users report that their devices run slowly after installing it.

Which choice completes the text with the most logical transition?

A) Moreover

B) Yet

C) Therefore

D) Likewise

31 RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- The Great Fire of London began in September 1666.
- It started in a bakery on Pudding Lane.
- It burned for four days.
- It destroyed more than 13,000 houses.
- Few deaths were recorded.

The student wants to explain a historical event to someone who knows little about it.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

A) Few deaths were recorded in the Great Fire of London.

B) The Great Fire of London began in September 1666.

C) The Great Fire of London, which began in a bakery on Pudding Lane in 1666, burned for four days and destroyed more than 13,000 houses.

D) A bakery on Pudding Lane was the site of a fire.

32 RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- Concrete is strong under compression.
- Concrete is weak under tension.
- Steel is strong under both compression and tension.
- Steel is more expensive than concrete.
- Reinforced concrete combines the two.

The student wants to contrast two materials.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) Concrete is strong under compression, and steel is more expensive than concrete.

(B) Reinforced concrete combines concrete and steel.

(C) Steel is strong under both compression and tension.

(D) Whereas concrete is strong under compression but weak under tension, steel is strong under both.

33 RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- In 2020, a volunteer group planted trees along the Marlow River.
- The group had 40 members.
- They planted 52,000 saplings in a single autumn.
- The saplings were of native species.
- The project was funded by donations.

The student wants to emphasise the scale of an achievement.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) In a single autumn, a group of just 40 volunteers planted 52,000 saplings along the Marlow River.

(B) A group of volunteers planted trees along the Marlow River in 2020.

(C) The saplings planted along the Marlow River were of native species.

(D) The planting along the Marlow River was funded by donations.

STOP If you finish before time is called, you may check your work on this module only. Do not turn to any other module in the test.

1 Reading and Writing Module 2

33 QUESTIONS 39 MINUTES

DIRECTIONS

The questions in this section address a number of important reading and writing skills. Each question includes one or more passages, which may include a table or graph. Read each passage and question carefully, and then choose the best answer to the question based on the passage(s).

All questions in this section are multiple-choice with four answer choices. Each question has a single best answer. Circle your answer in the booklet.

PACE YOURSELF

You have **39 minutes** for **33 questions**, which is about **71 seconds** a question. Answer what you can quickly, circle the ones that need more time, and come back to them before time is called. There is no penalty for a wrong answer, so never leave a question blank. This module is harder than Module 1.

WHAT YOU WILL SEE IN THIS MODULE

- Words in context
- Text structure and purpose
- Cross-text connections
- Central ideas and details
- Command of evidence: quantitative
- Command of evidence: textual
- Inferences
- Boundaries
- Form, structure, and sense
- Transitions
- Rhetorical synthesis

Questions 1 to 4 of 33

1 WORDS IN CONTEXT

The treatise's conclusions were so _____ with the orthodoxy of its day that its author thought it prudent to circulate it anonymously, fearing the censure of the church.

Which choice completes the text with the most logical and precise word or phrase?

(A) in step
(B) bound up
(C) satisfied
(D) at odds

2 WORDS IN CONTEXT

Critics who expected the memoir to be _____ were surprised by its candour: the author describes her own failures as frankly as her triumphs.

Which choice completes the text with the most logical and precise word or phrase?

(A) self-congratulatory
(B) unsparing
(C) tentative
(D) disjointed

3 WORDS IN CONTEXT

The curator described the donor's gift as a _____ in the museum's history: before it, the collection held almost nothing from the period; afterwards, it became the best in the country.

Which choice completes the text with the most logical and precise word or phrase?

(A) setback
(B) digression
(C) watershed
(D) formality

4 WORDS IN CONTEXT

The jury found the defendant's account _____, noting that his statements to the police and to the court contradicted one another on key points.

Which choice completes the text with the most logical and precise word or phrase?

(A) lucid
(B) inconsistent
(C) corroborated
(D) unassailable

5 WORDS IN CONTEXT

The conductor's _____ approach to the score, which retained every marking the composer had written and added none of her own, divided critics, some of whom found it faithful and others lifeless.

Which choice completes the text with the most logical and precise word or phrase?

A) cavalier

B) capricious

C) scrupulous

D) exuberant

6 TEXT STRUCTURE AND PURPOSE

The following text is adapted from an original essay about the history of navigation.

> Before the invention of the marine chronometer, sailors could find their latitude by the stars but not their longitude, and ships were regularly wrecked on coasts they believed to be far away. The problem was so serious that in 1714 the British government offered a large prize to anyone who could solve it. The solution, a clock that kept accurate time at sea, came from a carpenter with no formal training.

Which choice best describes the function of the underlined sentence in the text as a whole?

A) It conveys the seriousness of a problem that the passage goes on to show was solved.

B) It explains how latitude was calculated before the chronometer.

C) It argues that the British government was responsible for the wrecks.

D) It describes the training of the carpenter who invented the clock.

7 TEXT STRUCTURE AND PURPOSE

The following text is from an original novel. Selwyn, an old fisherman, is watching a young stranger attempt to row his boat.

> The boy pulled too hard on the left oar, and the boat turned slowly in a circle, as boats will for the first hour of anyone's life. Selwyn let him. It was a kind of courtesy, he thought, to let a person fail in private, even if the privacy was only a matter of keeping one's face still. When the boy looked up, flushed and furious, Selwyn merely nodded toward the shore, as though they had both agreed on the destination all along.

Which choice best states the main purpose of the text?

(A) To suggest that Selwyn is amused by the boy's failure

(B) To show that the boy is reluctant to learn to row

(C) To explain why Selwyn no longer fishes

(D) To illustrate Selwyn's patient, tactful way of treating someone who is learning

8 TEXT STRUCTURE AND PURPOSE

The following text is from an original poem.

> My grandmother had one word for the sea:
> she called it "work," and meant no insult by it.
> The word was salt and rope and arithmetic,
> the tide tables pinned beside the stove.
> I thought of it as water. I was young.
> I did not know that every word we use
> is something someone's hands once had to learn.

Which choice best describes the overall structure of the text?

(A) The speaker describes a place, then predicts how it will change.

(B) The speaker reports how another person described something and then reflects on what the speaker once failed to understand.

(C) The speaker asks a series of questions, then summarises the answers.

(D) The speaker argues against a belief, then concedes it is true.

9 CROSS-TEXT CONNECTIONS

TEXT 1

Some linguists propose that all human languages share a deep grammatical structure, which explains why children everywhere learn their first language so quickly and with so little instruction.

TEXT 2

A researcher who studies children's speech argues that children are exposed to far more language than the first view assumes, and that they are skilled at detecting statistical patterns in what they hear. She suggests that this ability, rather than an inborn grammar, may account for the speed of learning.

Based on the texts, how would the researcher in Text 2 most likely respond to the proposal in Text 1?

(A) By agreeing that children receive little exposure to language

(B) By denying that children learn language quickly

(C) By claiming that languages share no features

(D) By offering a different explanation for the speed with which children learn language

10 CENTRAL IDEAS AND DETAILS

The following text is adapted from an original science article.

> The long-standing view that the brain stops generating neurons in adulthood has been revised. Studies of a region involved in memory show that new neurons continue to form throughout life, though at a declining rate. Their role is still debated, but experiments in which the formation of new neurons was blocked found that animals had difficulty telling apart similar situations, suggesting that the new cells help the brain keep distinct memories from blurring together.

Which choice best states the main idea of the text?

(A) The brain produces neurons at an increasing rate with age.

(B) Memory is unaffected by the number of neurons in the brain.

(C) Adult brains continue to produce neurons, which may help distinguish similar memories.

(D) Researchers have agreed on the exact role of new neurons.

11 CENTRAL IDEAS AND DETAILS

The following text is from an original essay about a famous painting.

> The painting has long been admired for the serenity of its central figure. Yet X-rays have revealed that the artist first painted her with a clenched fist and a turned head, as though about to leave the room. He then painted over this version, opened the hand and lowered the gaze. The calm for which the work is celebrated was not the artist's first idea; it was an achievement of revision.

Which choice best states the main idea of the text?

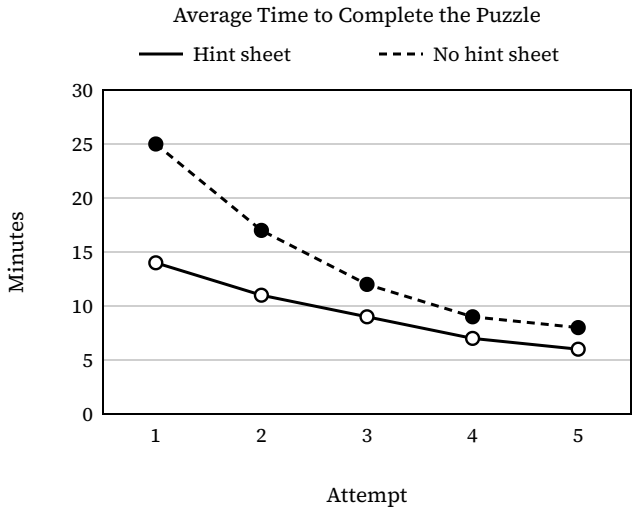

(A) The serenity admired in the painting resulted from the artist's revision of an earlier, more tense design.

(B) X-rays show that the painting is a forgery.

(C) The artist intended the figure to look as if she were leaving.

(D) The painting has been admired chiefly for its colours.

12 COMMAND OF EVIDENCE: QUANTITATIVE

A researcher measured the average length of time, in minutes, that volunteers needed to complete a puzzle on each of five attempts, with and without a hint sheet. She wants to claim that the hint sheet helped most on the first attempt.

Which choice most effectively uses data from the graph to support the researcher's claim?

(A) On the fifth attempt, volunteers with the hint sheet finished in 6 minutes, and those without it in 8.

(B) On the first attempt, volunteers with the hint sheet finished in 14 minutes, 11 minutes faster than those without it, a larger gap than on any later attempt.

(C) Volunteers with the hint sheet finished faster on every attempt than those without it.

(D) On the first attempt, volunteers without the hint sheet needed 25 minutes.

13 COMMAND OF EVIDENCE: QUANTITATIVE

Nesting Pairs by Reserve

Reserve	2015	2023
Fenwick (small)	8	27
Orrin (small)	5	19
Larch (large)	41	52
Dunmore (large)	36	40

A conservation group counted the pairs of a rare bird nesting in four reserves in 2015 and 2023. A spokesperson wants to claim that the species recovered strongly in the two smaller reserves.

Which choice most effectively uses data from the table to support the spokesperson's claim?

(A) In the two larger reserves, the number of nesting pairs rose from 41 to 52 and from 36 to 40.

(B) In the two smaller reserves, the number of nesting pairs more than tripled, from 8 to 27 in Fenwick and from 5 to 19 in Orrin.

(C) In Fenwick, the number of nesting pairs rose from 8 to 27, an increase of 19.

(D) The total number of nesting pairs across all four reserves rose by 75.

14 COMMAND OF EVIDENCE: TEXTUAL

The following text is adapted from an original essay about a writer.

> The essayist Corin Vale rarely revised a sentence once it was written down. Friends who watched him at work reported that he composed slowly, sometimes a single line in an hour, pacing the room and muttering, and that he set the sentence down only when it was finished. His manuscripts, consequently, are almost free of corrections.

A student claims that Vale's manuscripts show few corrections because of how he composed. Which quotation from the text best supports the student's claim?

(A) "he composed slowly, sometimes a single line in an hour, pacing the room and muttering, and that he set the sentence down only when it was finished"

(B) "The essayist Corin Vale rarely revised a sentence once it was written down."

(C) "Friends who watched him at work reported"

(D) "His manuscripts, consequently, are almost free of corrections."

15 COMMAND OF EVIDENCE: TEXTUAL

A student wants to claim that a certain pesticide harms bees only when combined with a second chemical.

> In an experiment, bees fed the pesticide alone showed no change in survival. Bees exposed to the second chemical alone also showed no change. Bees exposed to both chemicals died at twice the rate of the control group.

Which finding from the text most directly supports the student's claim?

(A) Bees fed the pesticide alone showed no change in survival.

(B) The bees in the control group were not exposed to any chemical.

(C) Bees exposed to both chemicals died at twice the rate of the control group, while those exposed to either one alone were unaffected.

(D) Bees exposed to the second chemical alone also showed no change.

16 COMMAND OF EVIDENCE: TEXTUAL

The following text is from an original essay about a city's growth.

> The city's population doubled in the decade after the railway arrived, rising from 40,000 to 80,000. Local historians credit the railway, but an economist argues that the arrival of a large cotton mill in the same year may have been more important, since most of the new residents found work there.

Which choice best describes the evidence the economist uses to support her alternative explanation?

(A) That the city's population doubled in a decade

(B) That historians credit the railway

(C) That the railway arrived in the city

(D) That most of the new residents found work at the mill

17 INFERENCES

The following text is adapted from an original essay about an experiment.

> A psychologist asked volunteers to estimate the number of beans in a jar. Individual guesses were widely scattered, some far too high and others far too low, but the average of all the guesses was within two percent of the true number. The result suggests that errors in individual estimates

Which choice most logically completes the text?

(A) are always small for any single person.

(B) are caused by the shape of the jar.

(C) tend to cancel out when many independent guesses are combined.

(D) cannot be reduced by combining guesses.

18 INFERENCES

The following text is from an original essay about invention.

> Many important inventions have been developed independently by several people at about the same time. The telephone, the telegraph and calculus all have rival claimants. Historians who note this pattern conclude that such inventions are less the product of isolated genius than of

Which choice most logically completes the text?

(A) chance discoveries that no one could have anticipated.

(B) the failure of earlier inventors to try hard.

(C) the greater intelligence of inventors in later ages.

(D) conditions that made the idea available to many people at once.

19 INFERENCES

The following text is adapted from an original science article.

> The brightness of certain stars varies in a regular cycle, and the length of the cycle is related to the star's true brightness: longer cycles belong to brighter stars. An astronomer who measures the cycle of such a star in a distant galaxy and compares the star's apparent brightness with the true brightness predicted by the cycle can therefore calculate

Which choice most logically completes the text?

(A) how old the star is.

(B) how far away the galaxy is.

(C) how many stars the galaxy contains.

(D) what the star is made of.

20 BOUNDARIES

The author of the novels, which _____ translated into thirty languages, lives in a small village.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) have been

(B) has been

(C) is

(D) was being

21 FORM, STRUCTURE, AND SENSE

The museum's director, together with two curators, _____ the exhibition's opening.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) were attending

(B) have attended

(C) attended

(D) attend

22 BOUNDARIES

Not until the 1950s _____ the cause of the disease identified.

Which choice completes the text so that it conforms to the conventions of Standard English?

(A) was

(B) were

(C) had

(D) has

23 FORM, STRUCTURE, AND SENSE

The expedition's success depended on careful planning, reliable equipment, and _____ .

Which choice completes the text so that it conforms to the conventions of Standard English?

A) local guides who cooperated well

B) that the local guides would cooperate

C) cooperating with the local guides

D) the cooperation of local guides

24 FORM, STRUCTURE, AND SENSE

The two sisters, _____ had been estranged for years, met by chance at a railway station.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) whom

B) who

C) which

D) whose

25 BOUNDARIES

The committee members were divided over the proposal _____ some thought it was too costly, others thought it did not go far enough.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) :

B) ,

C) which

D) ; and

26 FORM, STRUCTURE, AND SENSE

Of the two proposals, the second is _____ detailed.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) the most

B) more than

C) most

D) the more

Questions 27 to 30 of 33

27 BOUNDARIES

The twelve _____ contributions to the project were recognised at the ceremony.

Which choice completes the text so that it conforms to the conventions of Standard English?

A) volunteer's
B) volunteers
C) volunteers'
D) volunteers's

28 TRANSITIONS

Many people assume that glass is made from sand alone. _____ it also requires soda ash and limestone, which lower the temperature at which sand melts.

Which choice completes the text with the most logical transition?

A) Instead,
B) In fact,
C) Similarly,
D) Meanwhile,

29 TRANSITIONS

Early critics found the film's pacing too slow. _____ audiences have embraced it, and it is now regarded as a classic.

Which choice completes the text with the most logical transition?

A) Over the years,
B) For example,
C) In contrast,
D) Namely,

30 TRANSITIONS

The expedition carried enough food for forty days. _____ a storm delayed the return by three weeks, and supplies ran short.

Which choice completes the text with the most logical transition?

A) Likewise,
B) Therefore,
C) In particular,
D) Unfortunately,

31 RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- The Clark's nutcracker is a bird found in western North America.
- In autumn, it hides tens of thousands of pine seeds in thousands of separate locations.
- It can recall most of these locations months later, under snow.
- Its main food is pine seeds.
- It has a long, sharp beak.

The student wants to highlight how an animal's behaviour is unusual.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) The Clark's nutcracker is a bird whose main food is pine seeds.

(B) The Clark's nutcracker hides tens of thousands of seeds in thousands of locations and can recall most of them months later, even under snow.

(C) The Clark's nutcracker has a long, sharp beak that it uses to extract seeds.

(D) The Clark's nutcracker is a bird found in western North America.

32 RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- The Wanderer's Almanac is a book of essays.
- It was published in 1962.
- It describes the changing seasons in a single valley.
- It is credited with inspiring the modern conservation movement in the author's country.
- The author was a farmer.

The student wants to explain the significance of a book to an audience of general readers.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

(A) The Wanderer's Almanac is a book of essays by a farmer.

(B) The Wanderer's Almanac describes the changing seasons in a single valley.

(C) Published in 1962, The Wanderer's Almanac, a book of essays on the changing seasons of a single valley, is credited with inspiring the modern conservation movement in its author's country.

(D) The author of The Wanderer's Almanac was a farmer who wrote about a valley.

33

RHETORICAL SYNTHESIS

While researching a topic, a student has taken the following notes:

- Heavy rain fell on the town for three days.
- The river rose two metres above its banks.
- The flooding closed the main road.
- The road was repaired in a week.
- The town's population is 6,000.

The student wants to give a cause and an effect.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

A) Heavy rain fell on the town for three days, and the road was repaired in a week.

B) The town, which has a population of 6,000, was flooded.

C) The river rose two metres above its banks, and the road was repaired in a week.

D) Three days of heavy rain raised the river two metres above its banks, and the resulting flooding closed the main road.

STOP If you finish before time is called, you may check your work on this module only. Do not turn to any other module in the test.

2 Math

27 QUESTIONS 43 MINUTES

DIRECTIONS

The questions in this section address a number of important math skills. Use of a calculator is permitted for all questions.

NOTES

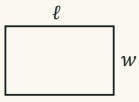

Unless otherwise indicated:

- All variables and expressions represent real numbers.
- Figures provided are drawn to scale.
- All figures lie in a plane.
- The domain of a given function f is the set of all real numbers x for which $f(x)$ is a real number.

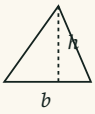

REFERENCE

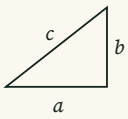

$A = \pi r^2$
$C = 2\pi r$

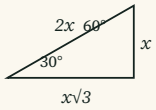

$A = \ell w$

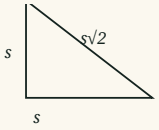

$A = \frac{1}{2}bh$

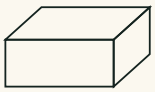

$c^2 = a^2 + b^2$

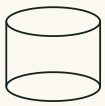

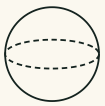

Special right triangles

$V = \ell wh$

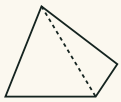

$V = \pi r^2 h$

$V = \frac{4}{3}\pi r^3$

$V = \frac{1}{3}\pi r^2 h$

$V = \frac{1}{3}\ell wh$

The number of degrees of arc in a circle is 360. The number of radians of arc in a circle is 2π. The sum of the measures in degrees of the angles of a triangle is 180.

ANSWERING THE QUESTIONS

For multiple-choice questions, solve each problem, choose the correct answer from the choices provided, and then circle your answer in the booklet. Circle only one answer for each question. If you change your mind, completely erase the circle. You will not get credit for questions with more than one answer circled, or for questions with no answers circled.

For student-produced response questions, solve each problem and write your answer in the box under the question.

- If you find **more than one correct answer,** write only one answer.
- Your answer can be up to 5 characters for a **positive** answer and up to 6 characters (including the negative sign) for a **negative** answer, but no more.
- If your answer is a **fraction** that is too long, write the decimal equivalent.
- If your answer is a **decimal** that is too long, truncate it or round at the fourth digit.
- If your answer is a **mixed number** (such as 3½), write it as an improper fraction (7/2) or its decimal equivalent (3.5).
- Do not include **symbols** such as a percent sign, comma, or dollar sign in your answer.

PACE YOURSELF

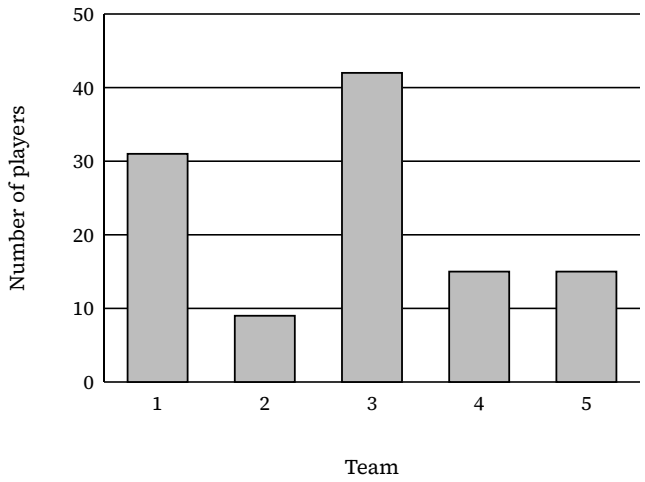

You have **43 minutes** for **27 questions**, which is about **96 seconds** a question. Answer what you can quickly, circle the ones that need more time, and come back to them before time is called. There is no penalty for a wrong answer, so never leave a question blank.

WHAT YOU WILL SEE IN THIS MODULE

Data analysis | Linear equations | Linear equations in context | Systems of equations | Functions | Nonlinear expressions | Ratios and rates | Triangles | Circles | Quadratics | Probability | Statistics | Scatterplots | Inequalities | Exponential functions | Linear functions | Percent change | Volume | Right triangles

Questions 1 to 5 of 27

1 DATA ANALYSIS

The bar graph shows the number of players in each of five teams. How many more players does Team 3 have than Team 2?

(A) 51

(B) 43

(C) 33

(D) 42

2 LINEAR EQUATIONS

If $6x + 7 = 3x + 22$, what is the value of x?

(A) 5

(B) 7

(C) 30

(D) 10

3 LINEAR EQUATIONS IN CONTEXT

A streaming service charges a $27 activation fee plus $23 per month. Which equation gives the total cost y, in dollars, of a subscription for m months?

(A) $y = 27m + 23$

(B) $y = 50m$

(C) $y = 23m - 27$

(D) $y = 23m + 27$

4 SYSTEMS OF EQUATIONS

$x + y = 7$
$x - y = 1$

What is the value of x?

(A) 3

(B) 4

(C) 7

(D) 1

5 FUNCTIONS

x	1	2	3	4
f(x)	8	10	12	14

The table shows four values of the linear function f. Which equation defines f?

(A) $f(x) = 6x + 2$

(B) $f(x) = 2x + 6$

(C) $f(x) = 2x + 8$

(D) $f(x) = 8x$

6 NONLINEAR EXPRESSIONS

Which expression is equivalent to $(3x^5)(4x^3)$?

A $7x^8$

B $12x^{15}$

C $12x^8$

D $7x^{15}$

7 RATIOS AND RATES

A recipe uses 5 cups of flour for every 3 cups of sugar. How many cups of flour are needed for 27 cups of sugar?

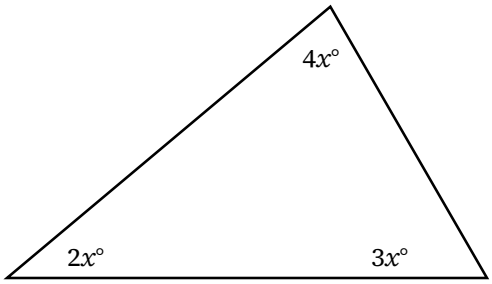

A 45

B 48

C 14

D 27

8 TRIANGLES

In the triangle shown, the three angles measure $2x°$, $3x°$, $4x°$. What is the value of x?

A 15

B 30

C 60

D 20

9 CIRCLES

A circle has a circumference of 22π centimetres. What is the area of the circle, in square centimetres?

A 22π

B 11π

C 121π

D 484π

10 QUADRATICS

What are the solutions to $x^2 + 3x - 28 = 0$?

A) 4 and 7

B) −7 and 4

C) −4 and −7

D) −4 and 7

11 PROBABILITY

How Students Travel to School

	Walk	Bike	Bus
Grade 9	20	20	30
Grade 10	19	17	28

The table shows how 134 students travel to school. If one student who goes by walking is chosen at random, what is the probability that the student is in Grade 10?

A) $\frac{19}{134}$

B) $\frac{20}{39}$

C) $\frac{39}{134}$

D) $\frac{19}{39}$

12 STATISTICS

The mean of 6 test scores is 82. A score of 96 is added. What is the mean of all 7 scores?

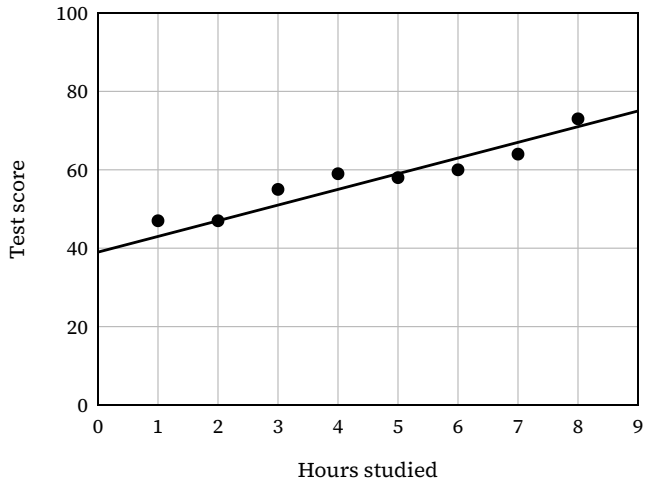

A) 84

B) 89

C) 83

D) 87

13 SCATTERPLOTS

The scatterplot shows the hours students studied and their test scores. The line of best fit is $y = 4x + 39$. According to the line, what is the predicted score for a student who studies 8 hours?

A) 32

B) 67

C) 71

D) 51

14 INEQUALITIES

A club needs at least 120 members to enter a competition, and 44 have already joined. If 25 new members join each week, which inequality represents the number of weeks, w, needed to reach the goal?

(A) $44 + 25w \leq 120$

(B) $25 + 44w \geq 120$

(C) $120 + 25w \geq 44$

(D) $44 + 25w \geq 120$

15 FUNCTIONS

The function f is defined by $f(x) = 3x^2 - 2x + 4$. What is the value of $f(5)$?

(A) 69

(B) 89

(C) 9

(D) 73

16 EXPONENTIAL FUNCTIONS

A population of bacteria triples every 6 hours. There are 800 bacteria at the start. Which function gives the number of bacteria after t hours?

(A) $P(t) = 800(3)^{6t}$

(B) $P(t) = 800(3)^{t/6}$

(C) $P(t) = 800(6)^{t/3}$

(D) $P(t) = 2400(t/6)$

17 LINEAR FUNCTIONS

A line in the xy-plane passes through the points (3, 12) and (6, 18). Which equation represents the line?

(A) $y = 3x + 6$

(B) $y = 2x + 8$

(C) $y = 2x + 6$

(D) $y = x - 6$

18 PERCENT CHANGE

A town's population grew from 6,000 to 6,900. By what percent did the population increase?

(A) 20%

(B) 30%

(C) 13%

(D) 15%

19 VOLUME

A cylinder has a radius of 4 centimetres and a height of 12 centimetres. What is its volume, in cubic centimetres?

(A) 192π

(B) 96π

(C) 48π

(D) 576π

20 RIGHT TRIANGLES

A right triangle has legs of length 7 and 24. What is the length of its hypotenuse?

(A) 31

(B) 25

(C) 625

(D) 17

21 QUADRATICS

What is the positive solution to the equation $x^2 - 8x - 20 = 0$?

Write your answer

22 LINEAR EQUATIONS

If $5(x - 5) = 6x - 27$, what is the value of x?

Write your answer

23 LINEAR EQUATIONS

If $\frac{2}{3}$ of a number is 32, what is the number?

Write your answer

24 SYSTEMS OF EQUATIONS

The sum of two numbers is 30, and their difference is 20. What is the larger of the two numbers?

Write your answer

25 RIGHT TRIANGLES

In a right triangle, one leg has length 8 and the hypotenuse has length 17. What is the length of the other leg?

Write your answer

26 PERCENT CHANGE

The price of a concert ticket rose from \$80 to \$92. By what percent did the price increase?

Write your answer

27 VOLUME

A cylinder has a radius of 6 and a height of 11. Its volume is $k\pi$. What is the value of k?

Write your answer

STOP If you finish before time is called, you may check your work on this module only. Do not turn to any other module in the test.

2 Math Module 2

27 QUESTIONS 43 MINUTES

DIRECTIONS

The questions in this section address a number of important math skills. Use of a calculator is permitted for all questions.

NOTES

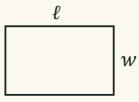

Unless otherwise indicated:

- All variables and expressions represent real numbers.
- Figures provided are drawn to scale.
- All figures lie in a plane.
- The domain of a given function f is the set of all real numbers x for which $f(x)$ is a real number.

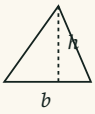

REFERENCE

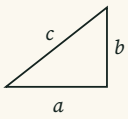

$A = \pi r^2$
$C = 2\pi r$

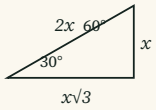

$A = \ell w$

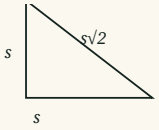

$A = \frac{1}{2}bh$

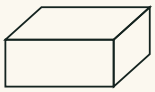

$c^2 = a^2 + b^2$

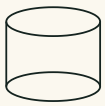

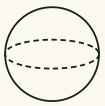

Special right triangles

$V = \ell wh$

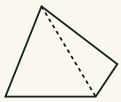

$V = \pi r^2 h$

$V = \frac{4}{3}\pi r^3$

$V = \frac{1}{3}\pi r^2 h$

$V = \frac{1}{3}\ell wh$

The number of degrees of arc in a circle is 360. The number of radians of arc in a circle is 2π. The sum of the measures in degrees of the angles of a triangle is 180.

Questions 1 to 5 of 27

1 PERCENTAGES

What is 40% of 300?

A) 180

B) 240

C) 340

D) 120

2 VOLUME

A cylinder has a radius of 3 centimetres and a height of 6 centimetres. What is its volume, in cubic centimetres?

A) 54π

B) 36π

C) 18π

D) 162π

3 INEQUALITIES

A club needs at least 200 members to enter a competition, and 54 have already joined. If 15 new members join each week, which inequality represents the number of weeks, w, needed to reach the goal?

A) $54 + 15w \leq 200$

B) $15 + 54w \geq 200$

C) $54 + 15w \geq 200$

D) $200 + 15w \geq 54$

4 STATISTICS

The mean of 5 test scores is 62. A score of 80 is added. What is the mean of all 6 scores?

A) 71

B) 65

C) 63

D) 68

5 FUNCTIONS

The function f is defined by $f(x) = 4x^2 - 2x + 4$. What is the value of $f(4)$?

A) 60

B) 76

C) 12

D) 64

6 PROBABILITY

How Students Travel to School

	Walk	Bike	Bus
Grade 9	14	30	21
Grade 10	12	27	19

The table shows how 123 students travel to school. If one student who goes by bus is chosen at random, what is the probability that the student is in Grade 10?

A $\frac{19}{123}$

B $\frac{19}{40}$

C $\frac{21}{40}$

D $\frac{40}{123}$

7 SYSTEMS OF EQUATIONS

$x + y = 26$
$x - y = 2$

What is the value of x?

A 12

B 26

C 2

D 14

8 EQUIVALENT EXPRESSIONS

Which expression is equivalent to $\frac{x^2 - 11x + 30}{x - 6}$, where $x \neq 6$?

A $x + 5$

B $x - 6$

C $x - 5$

D $x - 30$

9 RATIOS AND RATES

One pump can fill a tank in 12 hours, and a second pump can fill it in 4 hours. Working together, how many hours do the two pumps take to fill the tank?

A 8

B 16

C 4

D 3

10 ABSOLUTE VALUE

How many integers x satisfy the inequality $|x - 5| \leq 4$?

A 8

B 5

C 9

D 4

11 PERCENTAGES

120 is p% greater than 40. What is the value of p?

A) 200

B) 300

C) 67

D) 80

12 STATISTICS

Data set A

Value	1	2	3	4	5
	4	4	5	8	9

Data set A has the five values shown. Data set B is formed by multiplying each value in A by 2 and then adding 11. Which of the following correctly compares the means and the standard deviations of the two data sets?

A) The mean of data set B is 17 greater than the mean of data set A, and the standard deviations are equal.

B) The mean of data set B is 17 greater than the mean of data set A, and the standard deviation of data set B is 2 times the standard deviation of data set A.

C) The mean of data set B is 11 greater than the mean of data set A, and the standard deviation of data set B is 2 times the standard deviation of data set A.

D) The mean of data set B is 2 times the mean of data set A, and the standard deviation of data set B is 11 greater than the standard deviation of data set A.

13 SYSTEMS OF EQUATIONS

$ax + 3y = 8$
$6x + 9y = 21$

In the given system of equations, a is a constant. If the system has no solution, what is the value of a?

A) 6

B) 5

C) 2

D) 9

14 LINEAR FUNCTIONS IN CONTEXT

$y = 4.2x + 30$

The equation gives the total cost y, in dollars, to rent a bicycle for x hours. Which statement is the best interpretation of 4.2 in this context?

A) The cost of each additional hour is $4.2.

B) The total cost of renting for 1 hour is $4.2.

C) The fixed fee for renting a bicycle is $4.2.

D) The cost of renting for 4.2 hours is $30.

15 SURFACE AREA

Two identical cubes are glued together along one full face to form a rectangular solid. The surface area of the solid is 640 square centimetres. What is the edge length, in centimetres, of each cube?

A) 10

B) 8

C) 7

D) 11

16 FUNCTIONS

The functions f and g are defined by $f(x) = 4x + 6$ and $g(x) = x^2 + 3$. What is the value of $f(g(2)) - g(f(2))$?

A) 233

B) 98

C) 165

D) −165

17 EXPONENTIAL EQUATIONS

If $2^{x+4} = 4^{x-1}$, what is the value of x?

A) 5

B) −2

C) 8

D) 6

18 PERCENTAGES

The price of an item is raised by 50%. Later, the new price is reduced by 20%. Compared with the original price, the final price is

A) 20% higher

B) 30% higher

C) 70% lower

D) the same as the original price

19 EXPONENTIAL FUNCTIONS

$V(x) = 5{,}000(0.9)^{x/6}$

The function V gives the value, in dollars, of a certain machine x months after it is purchased. By what percent does the value of the machine decrease each year?

A) 90%

B) 10%

C) 19%

D) 81%

20 EQUIVALENT EXPRESSIONS

Which expression is equivalent to $(3x + 2)^2 - (x - 4)^2$?

A) $8x^2 + 4x - 12$

B) $8x^2 + 20x - 12$

C) $8x^2 + 20x + 20$

D) $10x^2 + 20x - 12$

21 SYSTEMS OF EQUATIONS

The sum of two numbers is 32, and their difference is 24. What is the larger of the two numbers?

Write your answer

Questions 22 to 27 of 27

22 QUADRATICS

The height h, in metres, of a ball t seconds after it is thrown is given by $h(t) = -t^2 + 8t + 20$. What is the maximum height, in metres, that the ball reaches?

Write your answer

23 SYSTEMS OF EQUATIONS

$4x + 3y = 14$
$3x + 4y = 14$

The solution to the given system of equations is (x, y). What is the value of $x + y$?

Write your answer

24 SIMILAR TRIANGLES

Triangle ABC is similar to triangle DEF, where A corresponds to D and B corresponds to E. In triangle ABC, AB = 3, BC = 5 and AC = 7. In triangle DEF, DE = 12. What is the perimeter of triangle DEF?

Write your answer

25 CIRCLES IN THE PLANE

$x^2 + y^2 + 4x + 12y = 9$

The equation of a circle in the xy-plane is shown. What is the radius of the circle?

Write your answer

26 QUADRATICS

The equation $x^2 + bx + 9 = 0$, where b is a positive constant, has exactly one real solution. What is the value of b?

Write your answer

27 SYSTEMS WITH NONLINEAR EQUATIONS

$y = x^2 + 2x + 9$
$y = 6x + k$

In the given system of equations, k is a constant. If the system has exactly one solution, what is the value of k?

Write your answer

STOP If you finish before time is called, you may check your work on this module only. Do not turn to any other module in the test.

Answer sheet

SAT Practice Test 5, Reading and Writing

Fill in the circle for each answer, or write your student-produced answers in the boxes. Then mark yourself with the separate mark scheme PDF.

Module 2

1	A	B	C	D
2	A	B	C	D
3	A	B	C	D
4	A	B	C	D
5	A	B	C	D
6	A	B	C	D
7	A	B	C	D
8	A	B	C	D
9	A	B	C	D
10	A	B	C	D
11	A	B	C	D
12	A	B	C	D
13	A	B	C	D
14	A	B	C	D
15	A	B	C	D
16	A	B	C	D
17	A	B	C	D
18	A	B	C	D
19	A	B	C	D
20	A	B	C	D
